DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT
FEDERAL HOUSING ADMINISTRATION
MORTGAGE AND LOAN INSURANCE PROGRAMS

SUMMARY OF THE BUDGET ESTIMATES

Mortgage Insurance Commitment Limitations. The Budget requests an overall mortgage insurance commitment limitation of $220 billion in new fiscal year 2006 FHA loan commitments. The proposed total includes $185 billion under the Mutual Mortgage and Cooperative Management Housing Insurance (MMI/CMHI) Fund, which will exclusively support insurance of home mortgages; and $35 billion under the General and Special Risk Insurance (GI/SRI) Fund which supports home, multifamily rental, and an assortment of special purpose (hospitals, nursing homes, etc.) mortgage insurance.

Direct Loan Limitations. The Budget requests a direct loan limitation of $50 million under both the MMI/CMHI and GI/SRI funds to facilitate the purchase of HUD properties acquired for resale to low- and moderate-income families.

Appropriations for Administrative Expense. A total of $720.9 million is requested for administrative and administrative contract expenses in the FHA program accounts. Of this total, $562.4 million will be transferred to Salaries and Expenses, HUD; $24 million will be transferred to the appropriation for the Office of Inspector General (OIG); and $134.5 million will be used for administrative contract expenses including $29.1 million to be transferred to the Working Capital Fund. Of the total $586.4 million transferred to the Department’s S&E, HUD and OIG accounts, $355 million will be from the MMI/CMHI account and 231.4 million will be from the GI/SRI account.

Appropriation for Mortgage Insurance Credit Subsidies. The Budget also requests an appropriation of $8.8 million to support the credit subsidies associated with loan guarantees committed under FHA's GI/SRI account. The credit subsidy is based on the net cost to the Government, exclusive of administrative expenses, of a direct loan or loan guarantee over its full term, discounted to present value at the Treasury's borrowing cost. In cases where premium and fee income is projected to be more than sufficient to support full costs (i.e., there is no net Federal cost), negative credit subsidy is generated as revenue to offset other spending or reduce the deficit.

PROGRAM DESCRIPTION

Through mortgage insurance, FHA helps lenders reduce their exposure to risk of default. This assistance allows lenders to make money available to more borrowers for home and home improvement loans, and apartment, hospital, and nursing home loans. FHA provides a vital link to financing for America’s housing needs.

Mortgage insurance has made financing available in neighborhoods and geographic areas facing economic uncertainty, and to individuals and families not adequately served by the conventional mortgage market. FHA has been a product innovator, and has seen the private sector follow with similar products and terms once they learn from FHA’s experience. FHA spreads and manages risk through geographically dispersed loan insurance activity and a portfolio that is diverse in borrowers and products.

Supporting FHA Administrative Costs

Annual Appropriations Acts include amounts under the MMI/CMHI and GI/SRI program accounts to be transferred to the Department’s S&E, HUD account and to the OIG to support the general overhead costs associated with the administration of the various insurance funds. In addition to these amounts, the program accounts also include appropriations to pay for certain programmatic contract expenses relating to the conduct of FHA’s endorsement, accounting and servicing, portfolio analysis, and other activities directly related to operations of the funds. For fiscal year 2006, the Department is proposing a total appropriation for the contract expenses of $134.5 million, of which $62.6 million is in the MMI/CMHI account and $71.9 million is in the GI/SRI account.

Costs associated with acquisition, management and disposition of specific assets, Headquarters-directed as well as field originated, are capitalized into the costs of those properties and notes, and affect the profit or loss realized on the disposition of the assets. These costs are not included in the FHA contract totals in the program accounts, but rather are reflected in the net cash flows reported in the FHA liquidating and financing accounts.

Summary Statement

Loan Guarantee Limitation. A loan guarantee limitation of $185 billion is requested for fiscal year 2006. New insurance commitments are estimated at $112.8 billion. The additional amount requested above the $112.8 billion is intended to minimize the possibility of reaching the limitation and suspending the program prior to the end of the year.

Appropriation. The Mutual Mortgage Insurance (MMI) Fund of the Federal Housing Administration (FHA) requests an appropriation of $417.6 million for administrative expenses for fiscal year 2006. Of this sum, $351 million is to be transferred to the Salaries and Expenses, HUD account, $4 million to the Office of Inspector General account, and $62.6 million is for administrative contract expenses, including a transfer of $18.3 million to the Working Capital Fund.

The MMI Fund is expected to generate $2.1 billion of negative subsidy on insurance written in fiscal year 2005 at a weighted average subsidy rate of –1.82 percent, reflecting administrative and statutory changes made, during the course of the fiscal year, in the terms of refunds of up-front premiums for prepaid loans.

In 2006, $1.9 billion in negative subsidy is expected to result from the current types of business and two new products--the FHA Payment Incentives and FHA Zero Downpayment. Both of these new lines of business are requested as new legislation in the 2006 budget. The weighted average subsidy rate that includes the proposed changes is -1.65 percent.

Direct Loan Limitation. A direct loan limitation of $50 million is also requested to facilitate the purchase and rehabilitation, if necessary, by non-profits and governmental agencies to make HUD-acquired single-family properties available for resale to low- and moderate-income families.

Initiatives

In fiscal year 2006, the following legislative changes are proposed:

- Add a new FHA Payment Incentives mortgage program structured to permit potential homebuyers who cannot meet existing underwriting standards due to poor credit ratings to qualify for FHA insurance. A borrower would still be required to meet debt, income, and repayment ability standards. Increased risk of default as well as increased cost associated with these borrowers are offset by requiring greater owner equity and by charging a higher up-front premium than the current 1 ½ percent and a higher annual premium than the one-half of 1 percent currently charged MMI borrowers.

After 60 months, the annual premiums, which are higher than those of the regular Section 203(b) program, will be reduced.

- Offer a new 100 percent financing mortgage product (Zero Downpayment) to help first time homebuyers purchase a home by allowing zero downpayment loans and financing of the settlement costs. Currently, MMI requires a minimum downpayment of 3 percent. Premiums will also be increased for these borrowers to cover the higher risk as well as to cover the increased cost involved.

- The two products will be included as separate risk categories to highlight and track performance over time. It is estimated that the new initiatives will generate $267.9 million in negative subsidy for fiscal year 2006, $230.5 million for Zero Downpayment and $37.4 million for Payment Incentives, at a subsidy rate of -.91 percent and -.47 percent, respectively.

- The Payment Incentives Proposal and the Zero Downpayment Proposal will generate 64 thousand and 204 thousand loans, respectively, which result in negative subsidy of $267.9 million.

Loan Guarantee Limitation: The fiscal year 2006 Budget requests $185 billion in loan guarantee limitation. This limitation includes sufficient authority for the new initiatives as well as standby commitment authority for unanticipated increases in business.

PROGRAM DESCRIPTION

MMI/CMHI Funds. The Mutual Mortgage Insurance Fund consists of the basic single-family home mortgage program (Section 203(b)), the largest of all the FHA programs.

The Section 203(b) program, enacted in the National Housing Act of 1934, provides mortgage insurance for one- to four-family residences. This program has contributed to expanding the opportunities for homeownership in the United States and will continue to meet the needs of first-time homebuyers, working families, and minority families, as well as underserved communities, especially central city and rural areas. Under the 203(b) program, any person able to meet the cash investment, mortgage payments and credit requirements may obtain an FHA-insured loan from a private lending institution to purchase a home.

The Cooperative Management Housing Insurance Fund finances the Cooperative Management Housing Insurance program (Section 213), which provides mortgage insurance for cooperative management housing projects of more than five units that are occupied by members of a cooperative management housing corporation. The insurance program can be used for new construction, rehabilitation, acquisition, improvement or repair of a project and resale of individual memberships in the cooperative. This program was enacted in 1950 and only minor program activity has occurred in recent years.

2005	. . .
2006 Estimate	$267,900
Program Improvements/Offsets	267,900

Proposed Actions

Legislative Changes:

The Payment Incentives proposal will allow MMI to reach out to the subprime market; however, by charging higher fees for an initial period during which the buyers demonstrate good payment histories, the increased risk for MMI will be offset by increased revenues. This program is expected to generate 64 thousand new loans in 2006 and $37 million in additional negative subsidy.

The second legislative proposal establishes another new program allowing financing of 100 percent of the cost of a home, as well as financing of the up-front insurance premiums and certain other settlement costs. Again, with higher premiums expected to cover the additional risk to the Fund, this proposal will generate 204 thousand new cases in 2006 and $231 million in additional negative subsidy.

Explanation of Indicators:

Improve National homeownership opportunities. This is a tracking indicator for which no numeric target is established because of the current dominant impact of the macroeconomy. The overall homeownership rate indicates the share of households that have achieved the "American dream" of homeownership. Homeownership is widely believed to encourage commitment to communities and good citizenship. The homeownership rate has reached record levels in recent years, but is resistant to increases above an undetermined level because homeownership is not practical or desirable for all households. HUD programs helped families take advantage of strong economic conditions to increase homeownership in recent years, contributing to a 69.0 percent homeownership rate in early 2004. HUD is promoting overall homeownership by striving to increase homeownership among subgroups that face greater barriers, including minority and low-income families, as well as families in central cities. Each 0.1 percentage point increase in the national homeownership rate translates to about 100,000 new homeowners (if total households remain constant). Such results are well within the scope of HUD program impacts reported under indicators H.1.3, H.1.4 and A.1.2, among others. Nevertheless, demographic and economic factors may limit the rate of progress in the near term.

The share of all homebuyers who are first-time homebuyers. This is a tracking indicator for which no numeric target is established because of the current dominant impact of the macroeconomy. Increases in overall ownership rates generally result when better opportunities become available for first-time homebuying by low- and moderate-income households. The most recent available data show that during calendar year 2003, 39.1 percent of homebuyers were purchasing their first home. A number of economic factors not controlled by HUD affect this outcome, especially changes in mortgage interest rates.

The number of FHA single-family mortgage insurance endorsements nationwide. This is a tracking indicator. FHA insures mortgages issued by private lenders, increasing access to mortgage capital so homeownership opportunities increase. This indicator tracks FHA's contribution to the homeownership rate through the annual volume of FHA-insured loans, and is a key component of the Department's efforts to improve the National Homeownership rate and fulfill the President's fiscal year 2002 commitment to creating 5.5 million new minority homeowners over a 10-year period. As such, this indicator greatly affects first-time and minority homeownership in addition to overall homeownership. While the number of FHA mortgage endorsements is a key measure of HUD's contribution to homeownership, the actual rate achieved during fiscal year 2005 will be dramatically affected by market forces outside of HUD's control, especially interest rates. Balancing the importance of reporting this key measure of HUD activity with an appreciation of the huge effect the market plays in the final result, the Department has decided to track this measure, but not establish a numeric goal for fiscal year 2005.

The share of first-time homebuyers among FHA-insured home purchase mortgages. This is a tracking indicator. FHA is a major source of mortgage financing for first-time buyers as well as for minority and lower-income buyers. HUD will help increase the overall homeownership rate, as well as reduce the homeownership gap between whites and minorities, by increasing FHA endorsements for first-time homebuyers. This indicator tracks the share of first-time homebuyers among FHA endorsements for home purchases—thus excluding loans made for home improvements.

The FHA Mutual Mortgage Insurance Fund meets Congressionally mandated capital reserve targets. FHA's Mutual Mortgage Insurance Fund (MMIF) covers all expenses, including insurance claims, incurred under FHA's basic single-family mortgage insurance program. The insurance program and fund are expected to be entirely self-financing from up-front and annual insurance premiums paid by borrowers obtaining FHA mortgage loans as well as from earnings on fund assets. Because the Department is expected to operate the program in an actuarially sound way, the Fund is subject to an annual actuarial review that assesses the Fund's current economic value, its capital ratio, and its ability to provide homeownership opportunities while remaining self-sustaining based on current and expected future cash flows.

The capital ratio is an important indicator of the MMIF's financial soundness and of its continuing ability to make homeownership affordable to more renters when economic downturns increase insurance claims. The capital ratio is defined as the sum of FHA's capital resources plus the net present value of expected future cash flows (resulting from premium collections, asset earnings, and insurance claim losses) divided by the amortized insurance-in-force. The capital ratio has exceeded the congressionally mandated 2 percent threshold for solvency since 1995.

The share of real estate owned (REO) properties that are sold to owner-occupants will be at 90 percent. This indicator tracks one measure of the Department's success in reducing the risk of predatory lending linked to property flipping. HUD intends to increase sales of its REO homes directly to families who will occupy them rather than to investors. In fiscal year 2004, 54.6 percent of REO properties were sold to owner-occupants. The fiscal year 2006 goal is to ensure that the share of REO properties that are sold to owner-occupants is 90 percent.

The minority homeownership rate. This is a tracking indicator for which no numeric target is established because of the current dominant impact of the macroeconomy. Many of HUD's programs improve homeownership by targeting underserved populations including minorities. Minority households represented 37.2 percent of all FHA-insured home purchases in fiscal year 2004. Strategies to increase minority homeownership include increased outreach and continued enforcement of equal opportunity in housing. The Department also is requesting increased funding for the Housing Counseling program. New counseling resources will help more members of minority and other underserved groups to build the knowledge to become homeowners and to sustain their new tenure by meeting the ongoing responsibilities of homeownership.

The share of minority homebuyers among FHA home purchase endorsements. FHA is a major source of mortgage financing for minority as well as lower-income buyers. Increasing the number of FHA endorsements for minority homebuyers will help reduce the homeownership gap between whites and minorities as well as increase the overall homeownership rate. This is a tracking indicator because FHA has limited control regarding the percentage of minority participation.

The mortgage disapproval rates of minority applicants. This is a tracking indicator for minority mortgage disapproval rates, an important early indicator of trends in minority homeownership. Equal access to home loans is critical for decreasing disparities in homeownership rates. However, lender decisions about which applications to accept or deny are primarily beyond HUD's control.

The most recent data available show that mortgage denial rates edged upward in 2003 for all racial and ethnic groups tracked for this indicator, as they also did for non-minority households. Disapprovals for minority households overall increased from 13.7 percent in 2002 to 15.3 percent in 2003. The lower success rate for minority mortgage applicants occurred during a year when low interest rates stimulated a record volume of home purchase applications. As a result, the higher denial rate conceals that fact that these data show 1.30 million minority home purchase applications were approved in 2003, a substantial increase from 1.12 million in 2002. The goals that HUD has established for the two largest secondary mortgage market lenders, Fannie Mae and Freddie Mac, encourage increased lending to minorities. In addition, FHA can increase minority lending through targeted marketing and counseling to potential minority home purchasers. Home Mortgage Disclosure Act (HMDA) database, consisting of calendar-year data submitted by lenders to the Federal Financial Institutions Examination Council (FFIEC) and HUD. HMDA data are available with a 1-year lag (calendar 2002 data will become available in August 2003).

Loss mitigation claims are 40 percent of total claims on FHA insured single-family mortgages. This indicator measures the success of FHA loan servicers in implementing statutorily required loss-mitigation techniques when borrowers default on their FHA mortgages. A borrower can resolve a default (90-day delinquency) in several ways short of foreclosure: for example, by paying down the delinquency (cure), by a pre-foreclosure sale with FHA perhaps paying an insurance claim in the amount of the shortfall, or by surrendering a deed in lieu of foreclosure. Better loss-mitigation efforts, such as enhanced borrower counseling, help borrowers keep their current homes or permit them to buy another home sooner. Avoidance of foreclosure also reduces FHA’s insurance losses, making FHA financially sounder and enabling it to help more borrowers. For both reasons, by achieving this goal HUD will help increase the overall homeownership rate.

The use of loss mitigation as a share of total claims increased from 50 percent in fiscal year 2003 to 54.2 percent in fiscal year 2004. The fiscal year 2005 goal is to ensure that 45 percent of the total number of claims are resolved through loss mitigation. Loss mitigation actions do not permanently stabilize many borrowers’ financial status. However, about 60 percent of borrowers who receive the benefits of loss mitigation remain current on their mortgage for at least a 12-month period. This reduction in foreclosure claim expenses is a key component of Departmental budget estimates for fiscal year 2005. Our programmatic objective is to sustain the high level of participation in loss mitigation even as the Office of Housing tightens programmatic requirements designated to increase the ultimate success rate of loss mitigation in helping borrowers avoid foreclosure.

Endorse FHA single-family mortgages in underserved communities. FHA’s role in the mortgage market is to extend homeownership to families that otherwise might not achieve homeownership. There is substantial evidence that lower-income and minority neighborhoods are less well served by the conventional mortgage market than are more affluent and non-minority neighborhoods. FHA lending in disadvantaged neighborhoods increases the homeownership rate.

While it is extremely important that FHA loans be available in underserved communities for those who otherwise might not become homeowners, it is also important that FHA be a complement to, and not a substitute for, conventional lending. A healthy housing market requires the availability of conventional mortgages as well. A goal for increasing FHA lending in such neighborhoods should not involve an increased FHA share of the total mortgage market in these communities, but should be accompanied by increased conventional lending as well. The fiscal year 2004 goal was 390,000 endorsements, and 394,232 was achieved. Given economic uncertainties, the fiscal year 2005 goal is to insure 390,000 mortgages in underserved areas. The achievement of this goal is strongly influenced by National economic conditions.

FHA will continue to address financial management and system deficiencies through the phased implementation of an integrated financial system to support FHA functions to be completed by December 2006. The FHA Comptroller has developed a Blueprint for Financial Management that will implement an integrated Core Financial Management System to address financial management and system deficiencies documented by HUD’s Inspector General, FHA and HUD financial statement auditors, OMB examiners and GAO auditors. The new Core Financial Management System will support the President’s Management Agenda for HUD in strengthening program controls through improved information systems. Implementing this new system is one of the Secretary’s strategic actions to address material weaknesses and reportable conditions identified in FHA’s most recent audited financial statement, reported to Congress in “Building the Public Trust.” The Blueprint for Financial Management also provides corrective action for 14 different FHA systems that are currently non-compliant with the requirements of OMB Circular A-127.

The plan for the development of an integrated Financial Management System that will address financial management and system deficiencies has the following key objectives:

- Implement U.S. Standard General Ledger and credit reform accounts in the FHA general ledger;
- Implement automated funds control processes using the FHA general ledger;
- Automate FHA’s interface with HUD’s general ledger;
- Produce FHA financial statements and regulatory reports directly from the FHA general ledger;
- Enhance FHA cash accounting and Treasury reconciliation with automated support from the integrated financial management system;
- Enhance FHA contract accounting with automated support from the integrated financial management system; and
- Eliminate manual accounting processes and improve integration of FHA financial and program systems.

This systems project has a phased implementation. In Phase I, FHA identified approximately 20 automated sources of accounting transactions within FHA’s insurance systems; defined pro-forma accounting transactions to support Federal Generally Accepted Accounting Principles; and acquired a commercial-off-the-shelf product that is compliant with the Joint Financial Management Improvement Program (JFMIP) to serve as the new core financial system.

In Phase II, FHA implemented the new JFMIP-compliant core financial software, beginning with the general ledger in October 2002. FHA will implement additional JFMIP-compliant modules of the core financial software to complete support for accounting operations by December 2004. During this same period, FHA will also upgrade the software for Web operation to improve critical accounting processes such as funds control.

In Phase III, FHA will complete the integration of its insurance systems with the new core financial system. Phase III of the project is expected to be completed by December 2006.

Justification of Proposed Changes in Appropriations Language

The 2006 President's Budget includes proposed changes in the appropriations language listed and explained below. New language is italicized and underlined, and language proposed for deletion is bracketed. New language is:

During fiscal year [2005] *2006*, commitments to guarantee loans to carry out the purposes of section 203(b) of the National Housing Act, as amended, shall not exceed a loan principal of $185,000,000,000.

During fiscal year [2005] *2006*, obligations to make direct loans to carry out the purposes of section 204(g) of the National Housing Act, as amended, shall not exceed $50,000,000: *Provided*, That the foregoing amount shall be for loans to nonprofit and governmental entities in connection with sales of single family real properties owned by the Secretary and formerly insured under the Mutual Mortgage Insurance Fund.

For administrative expenses necessary to carry out the guaranteed and direct loan program, [$356,906,000] *$355,000,000*, of which not to exceed [$352,906,000] *$351,000,000* shall be transferred to the appropriation for ‘‘Salaries and expenses’’; and not to exceed $4,000,000 shall be transferred to the appropriation for ‘‘Office of Inspector General’’. In addition, for administrative contract expenses, [$78,000,000] *$62,600,000*, of which [$15,000,000] *$18,281,000* shall be transferred to the Working Capital Fund: *Provided,* That to the extent guaranteed loan commitments exceed $65,500,000,000 on or before April 1, [2005] *2006*, an additional $1,400 for administrative contract expenses shall be available for each $1,000,000 in additional guaranteed loan commitments (including a pro rata amount for any amount below $1,000,000), but in no case shall funds made available by this proviso exceed $30,000,000. *(Departments of Veterans Affairs and Housing and Urban Development, and Independent Agencies Appropriations Act, FY 2005.)*

Administrative Provisions:

(1) FHA PAYMENT INCENTIVES PROGRAM

Sec. 216. Title II of the National Housing Act (12 U.S.C. 1707 et seq.) is amended by adding the following new section at the end:

“SEC. 257. FHA PAYMENT INCENTIVES PROGRAM. For purposes of establishing an alternative to high cost mortgages for borrowers with credit impairments, the Secretary may insure under sections 203(b) and 234(c) of this title any mortgage that meets the requirements of such sections, except as provided in the following sentences. The Secretary may establish lower percentages of appraised value limitations than those provided in section 203(b)(2)(B). Notwithstanding section 203(c)(2)(B), the Secretary may establish and collect annual premium payments in an amount not exceeding 1.0 percent of the remaining insured principal balance, and such payments may be reduced or eliminated in subsequent years based on mortgage payment performance. All mortgages insured pursuant to this section shall be obligations of the Mutual Mortgage Insurance Fund, notwithstanding section 519 of this Act.”

(2) ZERO DOWNPAYMENT

Sec. 217. Section 203 of the National Housing Act (12 U.S.C. 1709) is amended by adding the following new subsection at the end:

"(y) Notwithstanding any provision of this section or any other section of this title, the Secretary is authorized to insure, and to commit to insure, any mortgage, involving a property upon which there is located a dwelling designed principally for a 1-family residence which (1) involves a principal obligation not in excess of 100 percent of the applicable maximum dollar amount limit under subsection (b)(2)(A) for a one unit dwelling and (2) is not in excess of 100 percent of the appraised value of the property plus any initial service charges, appraisal, inspection, and other fees in connection with the mortgage as approved by the Secretary. The

Secretary is authorized to establish any additional requirements as may be necessary, or appropriate, including requirements regarding mortgagor and property eligibility."; and

(b) In Section 519(e):

(1) *by striking "and" after "203(h)" and inserting a comma; and*

(2) *by inserting after "203(i),"" and 203(y),".*

Explanation of Changes

Adds a new product to the MMI program allowing for borrowers with impaired credit ratings to get MMI insurance, with payment of higher fees to cover additional risk; and

Adds an additional new product to the MMI program allowing the Fund to insure 100 percent of the value of a home, along with certain closing costs, with payment of higher fees to cover the increased risk.

Program Improvements/Offsets	-11,667	-29,823	+32,590	-8,900	-9,000	-33,000

a/ Includes only carryover for positive credit subsidy, which consists of unused annual appropriations and $39,912,000 from the fiscal year 2001 Emergency Supplemental Appropriation (P.L. 106-554) of $40,000,000 reduced by a .22 percent governmentwide rescission. However, the funds from the Emergency Supplemental Appropriation are not available to the Department. Funds for other purposes expired at the end of prior fiscal year and are not reflected in the carryover total.

b/ Amount reflects the .59 percent governmentwide rescission.

c/ Rescission of funds from the unobligated balance of credit subsidy appropriated in previous fiscal years plus the .80 percent governmentwide rescission.

d/ Excludes re-estimates.

Summary Statement

Loan Guarantee Limitation. A loan guarantee limitation of $35 billion is requested for fiscal year 2006. New insurance commitments are estimated at $21 billion. The additional amount requested above $21 billion is intended to minimize the possibility of reaching the limitation and suspending program activity prior to the end of the year. It is estimated that of this amount, $8.8 billion in insurance commitments will be issued for FHA's multifamily and healthcare-related programs. Another $600 million is estimated in hospital mortgage insurance commitments. Single-family and Title I commitments are projected at $11.6 billion.

Direct Loan Limitation. A direct loan limitation of $50 million is also requested. Of this amount, $30 million is intended for bridge loan financing to facilitate the sale of multifamily projects, and $20 million is for 5-year purchase money mortgages for non-profit and governmental agencies to make HUD-acquired single-family properties available for resale to purchasers at or below 115 percent of area median incomes.

Appropriations. The 2006 budget request includes appropriations of $8.8 million for positive credit subsidy. That amount, together with an estimated $7.1 million in carryover, will be necessary for commitments related to the few relatively small loan programs in the GI/SRI Fund requiring such subsidies. Out of the $7.1 million in carryover, $1 million is Church Arson funding. Appropriations of $231.4 million in administrative expenses are also requested, of which $211.4 million is transferred to the Salaries and Expenses, HUD account, $20 million is transferred to the Office of Inspector General account, and $71.9 million will be used for administrative contract expenses, including a transfer of $10.8 million to the Working Capital Fund for systems development.

The Department proposes to remit $39.9 million back to the Treasury. This amount is the balance of the $40 million received from the fiscal year 2001 Emergency Supplemental Appropriation (P.L. 106-554), net of the .22 percent governmentwide rescission.

Initiatives

In fiscal year 2006, the Department is not proposing any new initiative for this program.

Proposed Actions

Appropriations. The 2006 request includes appropriations of $8.8 million for positive credit subsidy. That amount, together with an estimated $7.1 million in carryover, will be necessary for commitments related to various multifamily programs and Title I loan programs in the GI/SRI program account. Of the $7.1 million in carryover, $1 million is Church Arson funding.

GI/SRI Insurance Programs. The Department offers a range of loan guarantee programs to address specialized mortgage financing needs. These products include mortgage insurance for rehabilitating, developing, and refinancing of apartment buildings, nursing home facilities, and nonprofit hospitals. In addition, single family mortgage guarantees are offered for condominium properties, home mortgages that also require rehabilitation financing, and home equity conversion mortgages for senior homeowners. Title I loan guarantees are also offered for manufactured housing and for property improvement loans. The Department's insurance programs will continue to meet the Nation’s need for decent, safe and affordable housing.

Hospital Programs. The Section 242 Program provides mortgage insurance for loans made for the construction, renovation, and/or equipping of acute care hospitals. Since the program began in 1968, FHA has insured 327 hospital mortgages totaling more than $10 billion. The Hospital Mortgage Insurance Program also includes: Section 241 supplemental loans; Section 223(a)(7) loans for refinancing existing insured projects; and Section 223(e) loans for hospitals in older, economically declining urban areas. The Hospital Mortgage Insurance Program is administered by HUD Headquarters, with additional administrative support from the U.S. Department of Health and Human Services.

Multifamily Credit Subsidy Rates. The Department continuously devotes significant efforts in updating and refining credit subsidy estimates. The credit subsidy estimates were developed after extensive consultation with the Office of Management and Budget (OMB) and reflect substantial additional analysis by the Department. Each year the extensive statistical base, from which projections of future loan performance is calculated, is updated with an additional year of actual data. The Department and OMB continue to examine the data, assumptions, and calculations, which are used to estimate loan program cash flows and subsidy rates in order to eliminate errors, and to seek improvements in the accuracy and reliability of the analysis.

The multifamily credit subsidy rates used in previous years reflected historic performance data for similar loans made over the past 40 years. Concerns were raised over the accuracy of these assumptions based on historical data in light of recent improvements in underwriting, program monitoring, and asset management, as well as unprecedented changes in tax law in the 1980’s adversely affecting the performance of loans in the FHA portfolio at that time.

For fiscal year 2006, the annual premium for mortgage guarantees under the tax credit and apartment refinance risk categories will be reduced to 45 basis points, matching the annual premium charged for the Sec. 221(d)(4) new construction/substantial rehabilitation apartment development program.

Under several statutory provisions, HUD has the authority to remedy problems with the operation and repair of FHA-insured multi-family properties. These authorities allow the use of rehabilitation grants and property sales at prices below their market value for properties in mortgage default. These authorities impose costs on the FHA insurance fund and, as there is little restriction to their use, represent an open-ended liability. This proposal would make several FHA multifamily authorities subject to appropriations. By making their use subject to appropriations, the Administration and Congress will be able to set the level of activity for these authorities and have an opportunity to better control their use. The 2006 Budget lowers spending under these authorities (relative to the current law baseline level) and therefore creates savings.

Title I Program Subsidy Rates. The fiscal year 2006 estimates for the Title I Programs reflect the loan characteristics of the property improvement and the manufactured housing program, which are incorporated into the cash flows used to calculate the subsidy rate for loan programs, in accordance with the Federal Credit Reform Act of 1990. Both of these loan products will incur positive subsidy costs in fiscal year 2006.

Title II Program Single Family Subsidy Rates. The GI/SRI single-family credit subsidy estimates also reflect review of loan performance. This includes updated loan performance data and assumptions of the major GI/SRI single-family programs that are currently active. Those mortgage insurance programs are 234(c) Condominium Housing and 203(k) Purchase/Rehabilitation. Premium policy changes for the 203(k) program that are expected to continue in the 2006 Budget include cancellation of annual premium when the loan to value ratio reaches 65 percent, rather than 78 percent. On an average 203(k) loan, it is estimated that an annual premium will be required for the first 17 years of a 30-year term.

The 2006 Budget includes a separate credit risk category and subsidy rate for the Home Equity Conversion Mortgage (HECM) program. In previous years, HECM cash flows were included with the Section 234(c) and Other category. A separate cash flow model was developed to improve the analysis of the cost of this very unique loan product. The HECM program allows elderly homeowners to borrow against the equity in the home without repayment as long as the borrower lives in the home. The loan volume of these reverse mortgages has increased dramatically as seniors have become aware of the this important financing option and activity levels now surpass that of the Sec. 234(c) condominium program. Establishment of a separate risk category was prompted by the increase in the size and the unique characteristics of this program.

Office Affordable Housing Preservation (OAHP). The Multifamily Assisted Housing Reform and Affordability Act of 1997, which was included in the 1998 Appropriations Act, created the Mark to Market program (M2M). The initial legislative authority established the Office of Multifamily Housing Assistance Restructuring (OMHAR) to administer M2M, with a sunset date of September 30, 2001. Prior to expiration, Public Law 107-116 extended OMHAR as an entity within the Office of Housing for an additional 3 years through fiscal year 2004 and extended the attendant mortgage restructuring authorities for another 5 years through fiscal year 2006. On October 1, 2004 the Office of Housing established the Office of Affordable Housing Preservation (OAHP) as the successor to OMHAR in the administration of the M2M program. The restructuring process is expected to preserve over 350,000 units of affordable housing stock through long-term use agreements. The restructurings are performed through oversight of a national network of 14 public Participating Administrative Entities (PAEs) and 8 private partners.

As of September 30, 2004, OMHAR reported completing over 2,400 restructurings, averaging 30-35 per month, and resulting in a reduction of Section 8 outlays of $189 million in fiscal year 2004. The average rent reduction is $99 per unit per month. The reductions in future Section 8 outlays and expected recoveries of second mortgage payments exceed the one-time costs of restructuring for FHA claims and PAE costs. In addition to ensuring long-term financial viability and achieving Section 8 savings, physical and managerial assessments are conducted for each property to assure the long-term viability of the portfolio. Expenses are analyzed to ensure efficient operations. Immediate capital needs are addressed through repair escrows. Long-term physical needs are provided through increased deposits to reserve for replacement accounts. Initial deposits to these accounts were increased on average from $1,297 to $3,349 per unit, and annual deposits increased on average from $245 to $461 per unit per year. Over 450 deals are currently in various stages of restructuring.

The Mark-to-Market (M2M) program realigns the owners' and HUD's interest by providing a return on the owner's equity through a capital recovery payment, an incentive performance fee, and 25 percent of net cash flow. The financial structure of the properties is designed to ensure efficient operations and maintenance of the properties. HUD is closely monitoring the performance of restructured properties through a portfolio management contract and through a "watch list" for at-risk properties which had rents reduced without a debt restructuring.

Mortgage Note Sales. FHA successfully executed GI/SRI Multifamily Mortgage Note Sales in fiscal year 2004 and will continue into 2006. In 2004, FHA sold 80 unsubsidized mortgage loans with an unpaid principal balance (UPB) of $454 million. These notes were valued to HUD at $133 million. The net sales proceeds amounted to $281 million. Negative subsidy realized from the sale amounted to $149 million.

FHA plans to continue selling Multifamily unsubsidized mortgage notes in fiscal years 2004 through 2006. Currently, large portions of the remaining multifamily notes are subsidized. Therefore, FHA is also planning to sell the subsidized inventory in fiscal year 2006. Ongoing note sale activity in the future will be driven by the amount of salable notes entering the inventory.

Multifamily Enforcement. The Department's multifamily housing enforcement strategy reflects the integrated and coordinated efforts of the Real Estate Assessment Center (REAC) within the Office of Public and Indian Housing and the Departmental Enforcement Center (DEC), an element of the Office of the General Counsel. REAC is completing a comprehensive and uniform portfoliowide assessment of the physical and financial condition of all the properties. Results are being forwarded to the Office of Housing's Multifamily Hubs for additional actions. The Multifamily Hubs are responsible for servicing the loans and overseeing subsidy contracts. In those cases where there appear to be severe performance problems, cases are referred to the DEC. The DEC evaluates each case it receives and, where the DEC decides that severe problems exist, the DEC provides an action plan to be implemented by the Hubs to address the problem(s). Qualitative improvement in the assessment and enforcement effort is being realized through the centralization and specialization of these staff. The ultimate goal, however, is improved living conditions for residents, improved neighborhoods, communities, and improved financial performance for FHA because performance standards for participants are raised.

NOTES

The 2004 Appropriation has been adjusted for the .59 percent governmentwide rescission.
The 2005 Appropriation of negative $20 million has been adjusted for the .80 percent governmentwide rescission and includes $10 million of positive credit subsidy appropriation request offset by $30 million of proposed rescission.

Mortgage and Loan Insurance Programs – GI/SRI Account

2004 Appropriation	$29,000,000[a/]
2005 Appropriation/Request	35,000,000
2006 Request	35,000,000
Program Improvements/Offsets	...

a/ Amount consists of $25 billion of commitment authority from fiscal year 2004 Appropriation (P.L. 108-199) and $4 billion in additional commitment authority from fiscal year 2004 Supplemental Appropriation (P.L. 108-301).

Proposed Actions

Loan Guarantee Limitation. The fiscal year 2006 Budget proposes $35 billion in loan guarantee limitation. This will cover an estimate of $21 billion of new commitments and leave $13.9 billion available for unanticipated increases in business. It is estimated that $8.8 billion in insurance commitments will be issued for multifamily and healthcare related programs. Another $600 million is estimated in hospital mortgage insurance commitments. Single family and Title I commitments are projected at $11.6 billion. These activities are discussed in detail in the previous section.

Explanation of Indicators

The share of all homebuyers who are first-time homebuyers. This is a tracking indicator for which no numeric target is established because of the current dominant impact of the macroeconomy. Increases in overall ownership rates generally result when better opportunities become available for first-time homebuying by low- and moderate-income households. The most recent available data show that during calendar year 2003, 39.1 percent of homebuyers were purchasing their first home. A number of economic factors not controlled by HUD affect this outcome, especially changes in mortgage interest rates.

The share of first-time homebuyers among FHA-insured home purchase mortgages. FHA is a major source of mortgage financing for first-time buyers as well as for minority and lower income buyers. HUD will help increase the overall homeownership rate, as well as reduce the homeownership gap between whites and minorities, by increasing FHA endorsements for first-time homebuyers.

This indicator tracks the share of first-time homebuyers among FHA endorsements for home purchases—thus excluding loans made for home improvements.

The number of FHA singlefamily mortgage insurance endorsements nationwide. This is a tracking indicator. FHA insures mortgages issued by private lenders, increasing access to mortgage capital so homeownership opportunities increase. This indicator tracks FHA's contribution to the homeownership rate through the annual volume of FHA-insured loans, and is a key component of the Department's efforts to improve the National Homeownership rate and fulfill the President's fiscal year 2002 commitment to creating 5.5 million new minority homeowners over a 10-year period. As such, this indicator greatly affects first-time and minority homeownership in addition to overall homeownership. While the number of FHA mortgage endorsements is a key measure of HUD's contribution to homeownership, the actual rate achieved during fiscal year 2005 will be dramatically affected by market forces outside of HUD's control, especially interest rates. Balancing the importance of reporting this key measure of HUD activity with an appreciation of the huge effect the market plays in the final result, the Department has decided to track this measure, but not establish a numeric goal for fiscal year 2005.

The share of REO properties that are sold to owner-occupants will be at 90 percent. This indicator tracks one measure of the Department's success in reducing the risk of predatory lending linked to property flipping. HUD intends to increase sales of its real estate owned homes directly to families who will occupy them rather than to investors. In fiscal year 2004, 62.2 percent of REO properties were sold to owner-occupants. The fiscal year 2006 goal is to ensure that the share of REO properties that are sold to owner-occupants is 90 percent.

The minority homeownership rate. This is a tracking indicator for which no numeric target is established because of the current dominant impact of the macroeconomy. Many of HUD's programs improve homeownership by targeting underserved populations including minorities. Minority households represented 37.2 percent of all FHA-insured home purchases in fiscal year 2004. Strategies to increase minority homeownership include increased outreach and continued enforcement of equal opportunity in housing. The Department also is requesting increased funding for the Housing Counseling program. New counseling resources will help more members of minority and other underserved groups to build the knowledge to become homeowners and to sustain their new tenure by meeting the ongoing responsibilities of homeownership.

The share of minority homebuyers among FHA home purchase-endorsements. FHA is a major source of mortgage financing for minority as well as lower income buyers. Increasing the number of FHA endorsements for minority homebuyers will help reduce the homeownership gap between whites and minorities as well as increase the overall homeownership rate. This is a tracking indicator because FHA has limited control regarding the percentage of minority participation.

The homeownership rate among households with incomes less than median family income. This tracking indicator has no numeric target because of the current dominant impact of the macroeconomy. Homeownership is advantageous because of its contributions to asset development, better neighborhoods and schools, stability of tenure, and wider choice of housing types. Holding other factors equal, homeownership improves outcomes for children on a number of dimensions, including school achievement and dropout rates. HUD is supporting increased homeownership among the half of all households who earn less than the national median family income in numerous ways. These include improved partnering, marketing and outreach, as well as through the higher loan limits recently approved for FHA. Over 70 percent of FHA-insured single-family mortgages in recent years have been to families with below-median income. Homeownership vouchers and CDBG, HOME and IHBG homeownership activities also primarily support this population.

The homeownership rate in central cities. This tracking indicator has no numeric target because of the current dominant impact of the macroeconomy. Central cities have below-average rates of homeownership—in part because of higher density development and multifamily housing—but also because of losses of middle-class families in past decades. Low homeownership can contribute to neighborhood decline because absentee landlords and their tenants put forth less maintenance effort than homeowners. In such cases, low homeownership often leads to a shrinking municipal tax base.

HUD is increasing marketing and outreach efforts to promote central city homeownership, including targeted sales of HUD-owned properties. The Department's geographically-targeted goals for the housing GSEs include central city criteria to help ensure that mortgage capital is available. Cities also are making efforts to increase homeownership rates, as a substantial proportion of HOME funds support new homebuyers. This indicator tracks the progress in reestablishing central cities as desirable places for long-term individual investment.

The mortgage disapproval rates of minority applicants. This is a tracking indicator for minority mortgage disapproval rates, an important early indicator of trends in minority homeownership. Equal access to home loans is critical for decreasing disparities in homeownership rates. However, lender decisions about which applications to accept or deny are primarily beyond HUD's control.

In 2003, the average mortgage disapproval rate for minority applicants was 15.3 percent. The primary cause of differences in mortgage disapprovals between ethnic groups is differences in average disposable income and creditworthiness. In some cases, lenders have been shown to discriminate against minority applicants for mortgages by disapproving their mortgages while approving nonminorities who were less creditworthy or had less income. In such cases, HUD can take fair housing enforcement actions. The goals that HUD has established for the two largest secondary mortgage market lenders, Fannie Mae and Freddie Mac, encourage increased lending to minorities. In addition, FHA can increase minority lending through targeted marketing and counseling to potential minority home purchasers.

Home Mortgage Disclosure Act (HMDA) database, consisting of calendar-year data submitted by lenders to the Federal Financial Institutions Examination Council (FFIEC) and HUD. The mortgage applications counted are conforming loans or loans insured by FHA, VA or the Rural Housing Service, and are limited to owner-occupied singlefamily home purchases from metropolitan areas. HMDA data are available with a 1 year lag (calendar 2004 data are not yet available)

Loss mitigation claims are 45 percent of total claims on FHA-insured single-family mortgages. This indicator measures the success of FHA loan servicers in implementing statutorily required loss-mitigation techniques when borrowers default on their FHA mortgages. A borrower can resolve a default (90-day delinquency) in several ways short of foreclosure: for example, by paying down the delinquency (cure), by a pre-foreclosure sale with FHA perhaps paying an insurance claim in the amount of the shortfall, or by surrendering a deed in lieu of foreclosure. Better loss-mitigation efforts, such as enhanced borrower counseling, help borrowers keep their current homes or permit them to buy another home sooner. Avoidance of foreclosure also reduces FHA's insurance losses, making FHA financially sounder and enabling it to help more borrowers. For both reasons, by achieving this goal HUD will help increase the overall homeownership rate.

The use of loss mitigation as a share of total claims increased from 49.7 percent in fiscal year 2002 to 54.2 percent in fiscal year 2004. The fiscal year 2006 goal is to ensure that 50 percent of the total number of claims are resolved through loss mitigation.

Loss mitigation actions do not permanently stabilize many borrowers' financial status. However, about 60 percent of borrowers who receive the benefits of loss mitigation remain current on their mortgage for at least a 12-month period. This reduction in foreclosure claim expenses is a key component of Departmental budget estimates for fiscal year 2006. Our programmatic objective is to sustain the high level of participation in loss mitigation even as the Office of Housing tightens programmatic requirements designated to increase the ultimate success rate of loss mitigation in helping borrowers avoid foreclosure.

FHA endorses at least 1,200 multifamily mortgages. FHA multifamily mortgage insurance plays an important role in the mortgage market, especially for a number of higher risk segments in the housing industry. These include small builders, buyers or owners of aging inner-city properties, and nonprofit sponsors. FHA's unique and valuable products include insurance that covers both the construction financing and long-term permanent financing of modest-cost rental housing, insurance for assisted living facilities, and a vehicle whereby lenders (including many with public purpose missions such as housing finance agencies) can gain access to the AAA rating of Ginnie Mae securities.

FHA brings stability to the market. Many conventional multifamily loans that otherwise would have gone into default as they reached maturity during the credit crunch of the early 1990s were successfully refinanced with FHA. FHA also retains a leadership position in the market for high loan-to-value and long-term fully-amortizing multifamily loans, which can help in the provision of affordable rental housing. Maintaining FHA multifamily volume will help make more decent rental housing available to consumers at modest cost. This indicator tracks FHA's annual output of initial multifamily endorsements.

The Department is maintaining its goal for fiscal year 2006 at 1,000 initial endorsements with the increased use of FHA's Multifamily Accelerated Processing program by lenders gaining knowledge and capacity in the program and of the Development Applications Processing system for automated underwriting of multifamily mortgages. Nonetheless, since FHA responds to local markets and the National economic conditions, it remains conservative in estimating this goal in the interest of assuring sound underwriting.

HUD will complete 80 percent of the initial fiscal year 2006 Mark-to-Market (M2M) pipeline during the fiscal year, reducing rents and restructuring mortgages where appropriate. Under the M2M program, the Office of Multifamily Housing Assistance Restructuring (OMHAR) analyzes FHA-insured multifamily properties for which Section 8 rents exceed comparable market rents, and reduces Section 8 rents to bring them in line with comparable market rents or levels that preserve financial viability. Properties also are eligible for debt restructuring that involves a write-down of the existing mortgage in conjunction with the reduced rent levels. Rent adjustments and mortgage restructuring reduce the average cost of providing housing assistance and help maintain the supply of good quality, affordable housing units. OMHAR administers M2M by contracting with Participating Administrative Entities (PAEs), including a number of state housing finance agencies, to conduct the mortgage restructuring.

The fiscal year 2006 goal is based on an OMHAR projection of anticipated workload, which is, in part, based on an estimate of market rents for contracts expiring in the future. These projections may be affected by owner decisions, real estate market trends, accuracy of the REMS database, and future legislative changes relative to M2M eligible properties. For fiscal year 2003, as of April 2003, OMHAR has completed 260 project actions, which is 55 percent of the APP goal of 470 project actions. In fiscal year 2002, OMHAR completed a total of 510 project actions which is 66 percent of the pipeline on October 1, 2001; in fiscal year 2001, OMHAR completed a total of 630 project actions which is 76 percent of the pipeline on October 1, 2000; and in fiscal year 2000, OMHAR completed a total of 519 project actions which is 66 percent of the pipeline on October 1, 1999. OMHAR's goal of 80 percent was based on the above completion rates and pipeline projections.

The number of multifamily properties in underserved areas insured by FHA is maintained at 25 percent of initial endorsements. FHA insures loans for new construction and substantial rehabilitation of multifamily rental units under Sections 221(d)(3), 221(d)(4), and 220, and risk-sharing under 542(b) and (c). Section 223(f) insures mortgages for existing multifamily properties, either to refinance an existing mortgage or to facilitate the purchase of a property. A moderate amount of rehabilitation cost may be included in the mortgage. These programs improve the quality and affordability of rental housing, and increasing their availability in underserved neighborhoods will promote revitalization of those neighborhoods.

This indicator tracks the number of units in multifamily properties within "underserved" neighborhoods that receive mortgage endorsements by FHA. Beginning in fiscal year 2003, refinanced mortgages are included. Section 202 and Section 811 properties are excluded. Underserved neighborhoods are defined in metropolitan areas as census tracts either with a minority population of 30 percent and median family income below 120 percent of the metropolitan area median, or with median family income at or below 90 percent of area median (irrespective of minority population percentage). A similar definition of underserved applies to nonmetropolitan areas, using counties rather than tracts.

The fiscal year 2006 goal is to maintain the number of units-–at 25 percent--building on an equivalent fiscal year 2005 goal. The achievement of this goal in fiscal year 2006 is influenced by National economic conditions.

<u>FHA will continue to address financial management and system deficiencies through the phased implementation of an integrated financial system to support FHA functions to be completed by December 2006</u>. The FHA Comptroller has developed a Blueprint for Financial Management that will implement an integrated Core Financial Management System to address financial management and system deficiencies documented by HUD's Inspector General, FHA and HUD financial statement auditors, OMB examiners and GAO auditors.

The new Core Financial Management System will support the President's Management Agenda for HUD in strengthening program controls through improved information systems. Implementing this new system is one of the Secretary's strategic actions to address material weaknesses and reportable conditions identified in FHA's most recent audited financial statement, reported to Congress in "Building the Public Trust." The Blueprint for Financial Management also provides corrective action for 14 different FHA systems that are currently non-compliant with the requirements of OMB Circular A-127.

The plan for the development of an integrated Financial Management System that will address financial management and system deficiencies has the following key objectives:

- Implement U.S. Standard General Ledger and credit reform accounts in the FHA general ledger;
- Implement automated funds control processes using the FHA general ledger;
- Automate FHA's interface with HUD's departmental general ledger;
- Produce FHA financial statements and regulatory reports directly from the FHA general ledger;
- Enhance FHA cash accounting and Treasury reconciliation with automated support from the integrated financial management system;
- Enhance FHA contract accounting with automated support from the integrated financial management system; and
- Eliminate manual accounting processes and improve integration of FHA financial and program systems.

This systems project has a phased implementation. In Phase I, FHA identified approximately 20 automated sources of accounting transactions within FHA's insurance systems; defined pro-forma accounting transactions to support Federal Generally Accepted Accounting Principles; and acquired a commercial-off-the-shelf product that is compliant with the Joint Financial Management Improvement Program (JFMIP) to serve as the new core financial system.

In Phase II, FHA implemented the new JFMIP-compliant core financial software, beginning with the general ledger in October 2002. FHA will implement additional JFMIP-compliant modules of the core financial software to complete support for accounting operations by December 2004. During this same period, FHA will also upgrade the software for Web operation to improve critical accounting processes such as funds control.

In Phase III, FHA will complete the integration of its insurance systems with the new core financial system. Phase III of the project is expected to be completed by December 2006.

Exceed the rate of net recovery received on the sale of property through the Accelerated Claim Program Demonstration (Section) 601. Under authority from Section 601 of the National Housing Act in 1999, HUD is implementing a demonstration program to reform the singlefamily claims and property disposition process and maximize recoveries on claims paid. Under the demonstration, FHA will take assignment of notes and transfer them to private parties for servicing, foreclosure avoidance, property management and asset dispositio. FHA has the opportunity to execute various asset disposition strategies as a part of the Accelerated Claim Demonstration (ACD), securitizations, whole loan sales, and a combination whole loan/pipeline sale. Currently, FHA is utilizing a structured financing and retaining an equity interest in the limited liability company formed to acquire, service and dispose of portfolios of single family notes. The overall goal of the Accelerated Claims Disposition (ACD) program is to ensure that FHA's public policy issues are addressed while expediting the disposition of defaulted FHA single family assets and maximizing the return to the FHA Insurance Funds. This indicator tracks the rate of recovery on FHA claims between fiscal years 2005 and 2006.

The Center will conduct comprehensive outreach to inform potential partners of HUD opportunities. The Center is executing a comprehensive outreach and technical assistance plan that uses the HUD regional and field offices, targeted media, and presentations at national and regional conferences. These efforts were initiated in fiscal year 2003 and will continue in fiscal year 2006. The Center-trained faith-based and community liaisons in each of HUD's 10 regional and 85 field offices will continue to conduct training and outreach on behalf of the Initiative and serve as a point-of-contact for the FBCOs in their region. The Center uses mass mailings, blast faxes, emails, and webcasts to inform FBCOs about the Initiative and HUD programs. The goal is to increase this list from the fiscal year 2004 target of 5,000 FBCOs to a fiscal year 2005 target of 10,000 FBCOs. The Center and the FBCI liaisons will conduct at least 80 grant-writing workshops in fiscal year 2005, which will enhance the ability of FBCOs to navigate the Government grant process-–especially the HUD grant process. The Center also publishes annually a CD-ROM with the SuperNOFA information and materials.

Justification of Proposed Changes in Appropriation Language

The 2006 President's Budget includes proposed changes in the appropriations language listed and explained below. New language is italicized and underlined, and language proposed for deletion is bracketed. The 2006 President's Budget includes proposed changes in the appropriation language listed and explained below.

For the cost of guaranteed loans, as authorized by sections 238 and 519 of the National Housing Act (12 U.S.C. 1715z–3 and 1735c), including the cost of loan guarantee modifications, as that term is defined in section 502 of the Congressional Budget Act of 1974, as amended, [$10,000,000] *$8,800,000*, to remain available until expended: *Provided,* That [these funds are available to subsidize] *commitments to guarantee loans shall not exceed $35,000,000,000 in* total loan principal, any part of which is to be guaranteed[, of up to $35,000,000,000].

Gross obligations for the principal amount of direct loans, as authorized by sections 204(g), 207(l), 238, and 519(a) of the National Housing Act, shall not exceed $50,000,000, of which not to exceed $30,000,000 shall be for bridge financing in connection with the sale of multifamily real properties owned by the Secretary and formerly insured under such Act; and of which not to exceed $20,000,000 shall be for loans to nonprofit and governmental entities in connection with the sale of single-family real properties owned by the Secretary and formerly insured under such Act.

In addition, for administrative expenses necessary to carry out the guaranteed and direct loan programs, [$227,767,000] *$231,400,000*, of which [$207,767,000] *$211,400,000* shall be transferred to the appropriation for ''Salaries and [expenses] *Expenses*''; and of which $20,000,000 shall be transferred to the appropriation for ''Office of Inspector General''.

In addition, for administrative contract expenses necessary to carry out the guaranteed and direct loan programs, [$86,000,000] *$71,900,000*, of which [$9,600,000] *$10,800,000* shall be transferred to the Working Capital Fund: *Provided,* That to the extent guaranteed loan commitments exceed $8,426,000,000 on or before April 1, [2005] *2006*, an additional $1,980 for administrative contract expenses shall be available for each $1,000,000 in additional guaranteed loan commitments over $8,426,000,000 (including a pro rata amount for any increment below $1,000,000), but in no case shall funds made available by this proviso exceed $14,400,000.

[(RESCISSION)]

[Of the unobligated balances remaining from credit subsidy appropriated in fiscal year 2004 and prior years under the heading “General and special risk program account”, $30,000,000 are rescinded.] *(Departments of Veterans Affairs and Housing and Urban Development, and Independent Agencies Appropriations Act, FY 2005.)*

Explanation of Changes

No new policy changes are proposed.
