(414) 286-8028**

Milwaukee, Wisconsin

The City of Milwaukee will collaborate with the National Center for Healthy Housing, Fight Asthma Milwaukee Allies, Hmong American Friendship Association, OIC Weatherization Assistance Program and the University of Cincinnati to document the level of environmental allergens in 75 homes of children with moderate to severe asthma. The target area is comprised of 10 high-risk zip codes in Milwaukee with pre-1950 housing and overlaps the target areas of the Milwaukee Health Department Childhood Lead Poisoning Prevention Program (CLPPP), the Community Development Block Grant Neighborhood Strategic Planning Areas and the Enterprise Zone. The 75 homes receiving environmental assessment and housing interventions will be upgraded as a part of this project.
