

**PROGRAMMATIC AGREEMENT
BETWEEN
KING COUNTY,
THE WASHINGTON STATE OFFICE OF ARCHAEOLOGY AND HISTORIC
PRESERVATION
AND
THE ADVISORY COUNCIL FOR HISTORIC PRESERVATION
FOR
THE ADMINISTRATION OF CERTAIN HUD-FUNDED ACTIVITIES**

WHEREAS, the U.S. Department of Housing and Urban Development (HUD) provides grant funding to King County, an Entitlement community in Washington; and

WHEREAS, King County now, or may in the future, administer HUD grant programs which include the following programs (HUD Programs):

- American Dream Downpayment Initiative Program
- Community Development Block Grant Program
- Emergency Shelter Grant Program
- FHA Multifamily Housing Finance Agency Risk Sharing Pilot Program
- HOME Investment Partnerships Program
- Housing Opportunities for People with AIDS Program
- Lead-Based Paint Hazard Control Grant Program
- Lead Hazard Reduction Demonstration Grant Program
- Neighborhood Initiative Program
- Section 8 Project Based Assistance Program including Single Room Occupancy Shelter Plus Care Program
- Special Projects Appropriated Under an Appropriations Act for HUD
- Supportive Housing Program

WHEREAS, HUD regulations at 24 CFR Part 58 implement statutory authorities that permit certain entities to assume HUD's environmental responsibilities for various HUD programs, and included among the statutory authorities under which this responsibility is assumed is compliance with Section 106 of the National Historic Preservation Act of 1966, as amended [16 U.S.C. 470 *et seq*] (Section 106); and

WHEREAS, King County has determined that implementation of the above-listed HUD Programs may include activities, such as rehabilitation, demolition and new construction, that may have an effect on properties included in or eligible for inclusion in the National Register of Historic Places (historic properties); and

WHEREAS, King County has determined that certain activities funded by the above-listed HUD Programs have the potential to affect historic properties and has consulted with the Washington State Historic Preservation Officer (SHPO) pursuant to 36 CFR 800.14 of the regulations implementing Section 106; and

WHEREAS, King County operates an historic preservation program that meets the standards of the Washington State Department of Archaeology and Historic Preservation and the National Park Service, is a Certified Local Government pursuant to 36 CFR Part 61.5, and has staff meeting the Secretary of Interior's Professional Qualification Standards for architecture, historic architecture, or architectural history (Certified Staff);

NOW, THEREFORE, King County, the SHPO and the Advisory Council on Historic Preservation (ACHP) agree that the HUD Programs shall be administered in accordance with the following stipulations to satisfy the Section 106 responsibilities of King County and HUD.

STIPULATIONS

King County will ensure that the following measures are carried out:

I. ACTIVITIES SUBJECT TO REVIEW

- A. Undertakings that are not identified in **Appendix A** or will occur on lands under tribal jurisdiction must be reviewed in accordance with 36 CFR Part 800.
- B. Activities listed in **Appendix A** have limited potential to affect historic properties and, when not on lands under tribal jurisdiction, may be approved by King County without further consultation with the SHPO, Indian Tribes or the ACHP.
- C. The list of activities described in **Appendix A** will be considered annually and reviewed and revised as needed by King County, the SHPO, and the ACHP.

II. DISCOVERIES, UNFORESEEN EFFECTS AND EMERGENCIES

Should King County, in the process of carrying out any action listed in **Appendix A**, find that the action has the potential to affect a previously unknown property that may be eligible for the National Register of Historic Places (National Register) or that the action will affect a known historic property in an unanticipated manner, King County will cease work on only the portions of the action that have the potential to affect the property and proceed in accordance with 36 CFR 800.13(b). Any actions taken in an emergency shall be reviewed in a manner consistent with 36 CFR 800.12. For the purposes of this Agreement, such actions are essential immediate responses to declared natural disasters, emergencies or other immediate threats to life or property, as defined in 36 CFR 800.12.

III. PUBLIC PARTICIPATION AND CONSULTATION

King County will solicit public comment regarding the effects of the undertaking on historic properties at regular meetings, and public notice announcing the date, time, location, and agenda of such meetings will be given. Regular meetings include meetings regularly held by the King County Landmarks Commission and meetings held by programs of the King County Department Community and Human Services at which public comment about proposed HUD-funded projects may be taken. The public notice

will also advise the public if the undertaking will have effects upon properties included in or eligible for inclusion in the National Register. The County will also distribute the public notice directly to previously identified concerned individuals, historic preservation organizations, and local history and heritage groups.

B. The King County Housing and Community Development Program (KCHCD) annual action plan for HUD-funded Programs shall include, at a minimum, a summary of the Section 106 process and a description of this Agreement and its requirements. KCHCD staff and Certified Staff shall ensure that information regarding this Agreement and the Section 106 process is included in periodic newsletters and other notices for public distribution.

IV. PUBLIC OBJECTIONS

A. In those cases where King County receives a public objection, Certified Staff will review the objection to determine the basis of the objection and consult with the objecting party, as appropriate, in order to resolve the issue.

B. Where the Certified Staff is unable to resolve the objection to the satisfaction of the objecting party and King County, King County will consult with the SHPO, and as appropriate, the ACHP.

V. MONITORING

The ACHP and the SHPO may monitor activities carried out pursuant to this Agreement, and the ACHP may formally review such activities if so requested. If requested, King County will coordinate access for the ACHP and the SHPO to carry out such monitoring and review.

VI. AMENDMENT

If any party to this Agreement determines that its terms cannot be met or believes an amendment is necessary, that party will immediately request the consulting parties to consider an amendment to the Agreement pursuant to 36 CFR 800.14. Such amendment will be executed in the same manner as the original documents.

VII. TERMINATION

Any consulting party to this Agreement may terminate the Agreement by providing thirty (30) days notice in writing to all other parties. In the event that the Agreement is terminated, King County will comply with 36 CFR Parts 800.3 through 800.7. Loss of qualified staff to conduct Section 106 reviews will automatically terminate King County's participation in this Agreement.

VIII. DISPUTE RESOLUTION

Should the SHPO or the ACHP object within thirty (30) days to any actions pursuant to this Agreement, King County will consult with the objecting party to resolve the objection. If King

County determines that the objection cannot be resolved, King County will forward all documentation relevant to the dispute to the ACHP, and the ACHP will either:

- A. Provide King County with recommendations which King County will take into account in reaching its final decision regarding the dispute: or
- B. Notify King County that it will comment pursuant to 36 CFR 800.7(c), and proceed to comment. Any ACHP comments provided in response to such a request will be taken into account by King County in accordance with 36 CFR 800.7 (c)(4) with reference to the subject of the dispute.
- C. Any recommendations or comments provided by the ACHP will be understood to pertain only to the subject of the dispute. King County's responsibility to carry out all actions under this Agreement that are not subject to dispute will remain unchanged.

IX. FAILURE TO CARRY OUT AGREEMENT

In the event the King County does not carry out the terms of this Agreement, King County will comply with 36 CFR Part 800.4 through 800.6 with regard to individual undertakings covered by this Agreement.

X. ANTI DEFICIENCY ACT

All commitments made under this Agreement are subject to the availability of funds. Nothing in this Agreement will be construed as limiting or affecting the legal authorities of King County, the SHPO, or the ACHP, or as binding upon the parties to perform beyond their respective authorities or to require any of the parties to assume or expend funds in excess of available appropriations. If funds are not available or are insufficient to meet the commitments of this Agreement, King County will consult to amend or terminate this Agreement.

XI. DURATION

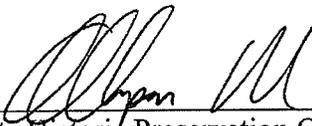

This Agreement will be in force for a ten-year period beginning the date of the signature of SHPO. At any time in the sixth-month period prior to such date, King County may request the SHPO and the ACHP to consider an extension or modification of this Agreement. No extension or modification will be effective unless all parties to the Agreement have agreed with it in writing.

Execution of this Programmatic Agreement by King County, the SHPO, the ACHP, and concurring Tribes, and implementation of its terms evidence that King County has taken into account the effects of this undertaking on historic properties and afforded the ACHP an opportunity to comment. This Agreement may be executed in counterpart.

**PROGRAMMATIC AGREEMENT

APPENDIX A

Properties considered eligible for National Register listing shall be reviewed by the Washington State Department of Archaeology and Historic Preservation (SHPO) staff for concurrence regarding their eligibility. Requests for concurrence shall include an electronic version of the SHPO's inventory database form with a current photograph, completed to the extent feasible with readily available information. Actions proposed for any property currently or likely to be certified for federal historic preservation income tax credits shall be submitted to the SHPO for review. All work performed on properties listed or eligible for listing in the National Register of Historic Places (National Register) must conform to the Secretary of the Interior's Standards for the Treatment of Historic Properties.

Properties within or in the immediate vicinity of registered or suspected archaeological sites are not exempt from review if a proposed project involves soil disturbance. Suspected archaeological sites are places for which verified reports of archaeological deposits or evidence of occupation or use in ethnographic accounts exist.

In the event that archaeological or historic materials are discovered during any project activities, including work in previously disturbed native soils, work in the immediate vicinity will be stopped, the area secured, and the King County Historic Preservation Program, the local cultural resource program (if any), the SHPO, and the affected tribe's cultural resource and administrative staff notified.

The following proposed undertakings, which have limited potential to affect historic properties, do not require review by the Advisory Council on Historic Preservation (ACHP), the SHPO or Certified Department of Housing and Urban Development (HUD) staff, unless they occur on lands under tribal jurisdiction.

- A. Rehabilitation of buildings and structures less than 45 years old, unless they were designed by a notable architect, constructed by a notable builder, or associated with events or persons significant in recent history.
- B. Rehabilitation of properties listed on or eligible for the National Register, (except for properties currently or likely to be certified for federal historic preservation income tax credits), to include:
 - 1. Repair, maintenance, removal, replacement or installation of the following systems provided that the proposed work does not affect historically significant exterior or interior features of the property.
 - a. electrical wiring,
 - b. water and plumbing systems (when historic features such as hand pumps or plumbing fixtures are retained),
 - c. heating and cooling systems and duct work.

2. Energy conservation measures (provided that such measures are not visible and do not alter or detract from those qualities that make the resource eligible for the National Register) to include:
 - a. insulation of roofs, crawl spaces, ceilings, attics, floors and around pipes/ducts as long as these measures do not induce, retain, or introduce moisture into a building; and insulation of exterior walls that does not damage or alter the exterior appearance of the building (note that installation that requires the drilling of holes in exterior features of the building and introduction of vents and/or ventilation systems is not exempt from SHPO review);
 - b. interior modifications that do not alter significant features or finishes;
 - c. caulking and weather stripping consistent with the appearance of the building; and
 - d. replacement or modification of the lighting systems, when existing systems or fixtures have no historic significance
3. Repair of existing doors and/or replacement in kind when they are beyond repair and replacements match the existing doors in design and materials.
4. Repair of existing window frames and sashes by patching, splicing, consolidating, or otherwise reinforcing or replacing only these parts that are extensively deteriorated or missing provided no changes result to the interior or exterior appearance of the window. Adjusting of counterweights is acceptable.
5. Replacement of broken clear glass with clear glass of similar thickness when no modification or damage to adjacent surfaces results.
6. Repair of existing materials and small-scale in kind replacement of wood siding, trim, porch decking, porch rails, joists, columns, and stairs (including framing).
7. Repair of footings, foundations, and retaining walls or in kind replacement of those portions done to match existing material and design. Any associated mortar replacement, if visible, shall be with a mortar mix that matches existing mortar mixes in color, texture, finishing, and appropriate formulation.
8. Repair of existing historically significant cabinetwork and cabinet hardware. Replacement in kind of only those elements that have deteriorated beyond repair when replacements match the existing design and materials
9. Repair and/or replacement of non-historic kitchen and bathroom appliances, fixtures, fittings, accessories, and cabinets with items that are compatible with the character of the historic property.
10. Installation of hardware to include: dead bolts, door hinges, latches and locks, window latches, locks and hinges and door peep holes provided existing hardware is not removed. New hardware shall be of contemporary design and made of the same material as existing hardware, if available.

11. Installation of fire, smoke, and security detectors provided any potential harmful physical effects are easily reversible.
12. Repair, refinishing and replacement in kind of only those portions of historic flooring that are extensively deteriorated.
13. Repair, refinishing and/or replacement of non-historic flooring and floor coverings, including vinyl tile and/or carpet, with similar materials compatible with the historic character of the building, when it is not feasible to reuse underlying historic materials.
14. Repair of existing window, door, and porch screens and storm windows or doors, or replacement in kind if repair is not feasible.
15. Removing deteriorated or damaged paint or coatings down to the next sound layer by hand scraping or sanding. Abrasive methods, sandblasting and waterblasting are specifically prohibited. Encapsulation of lead-based paint is acceptable.
16. Repair and/or replacement in kind of existing roofing material provided the color meets the standards of the (Tribe/City/County or State) or the existing color. Adequate anchorage of the roofing material to guard against wind damage and moisture penetration shall be provided.
17. Installation of wheelchair ramps meeting code as long as ramps can be easily removed and are not permanently affixed to the structure.

C. Infrastructure

Upgrading, replacement and repair of existing utility service lines, sewer systems and septic lines and systems, only if prior ground disturbance is demonstrated and new disturbance is entirely within previously disturbed areas. Note that disturbed native soils may contain disturbed but significant archaeological deposits.

D. Site and Public Improvements

1. Paving, re-surfacing, and repair of streets, driveways, parking lots, and gutters within the dimensions that they now occupy. Replacement or installation of curbs and/or sidewalks, except in historic districts or on properties where such landscape features contribute to making the resource eligible for National Register listing.
2. In kind repair or replacement of site improvements in the same location and scale, including, but not limited to fences, retaining walls, and landscaping.

3. Removal of pest animals, birds, insects and their associated debris when no loss of historic materials will result.
4. Replacement and/or installation of traffic signals, street name and regulatory signage, or temporary fences except in historic districts or on properties where significant characteristics of the resource would be adversely affected by such installations.
5. Replacement and installation of park and playground equipment, landscaping, and facilities (excluding buildings) except in historic districts or on properties where significant historic characteristics of the property would be impacted by such replacement and installation.

E. Other

1. Projects outside known or suspected archaeological sites where
 - a. excavation is limited to previously disturbed areas (this must be demonstrated), or
 - b. work involves excavation less than 8 inches in depth over an area of less than 10 square feet will not require archaeological assessments and/or surveys.

UNANTICIPATED DISCOVERY PLAN FOR CULTURAL RESOURCES DURING HUD-AFFILIATED PROJECTS, KING COUNTY, WASHINGTON

1. INTRODUCTION

In order to address the need for post-review discovery and consultation among the U.S. Department of Housing and Urban Development (HUD), Washington State Historic Preservation Office (SHPO), the King County Department of Community and Human Services (DCHS) and affected tribe(s), this document serves as the primary guidance tool for the treatment of cultural resources discovered during the project. Discovered archaeological materials include, but are not limited to, human skeletal remains, artifacts, sites or any other cultural resources eligible, or potentially eligible, for listing in the National Register of Historic Places (NRHP). This plan is intended to provide guidance to King County and their contractors and subcontractors so they can:

- Comply with any applicable Federal and State laws and regulations, particularly 36 CFR 800 (as amended August 5, 2004) that implements Section 106 of the National Historic Preservation Act of 1966, and seek guidance from Title 27 Revised Codes of Washington Chapter 27.44 Indian Graves and Records, Chapter 27.53 Archaeological Sites and Resources; and
- Describe to regulatory and review agencies the procedures agents shall follow to prepare for and deal with unanticipated discoveries;
- Provide direction and guidance to project personnel for the proper procedures to be followed should an unanticipated discovery occur and
- Provide current contact information for notification upon any discovery.

2. SPECIAL PROCEDURES FOR THE DISCOVERY OF HUMAN SKELETAL MATERIAL

Upon discovery of human remains - Immediately Call:

King County Sheriff's Office (206) 296-4155
Tom Minichillo, Archaeologist, King County Roads Division (206) 296-8085

Any human skeletal remains, regardless of ethnic origin, which may be discovered during this project, shall at all times be treated with dignity and respect.

- A. During all project operations, if any DCHS employee or any of its contractors or subcontractors believes that he or she has made an unanticipated discovery of human skeletal remains, all work adjacent to the discovery shall cease immediately and the above contacts be notified. A 50-foot work stoppage area shall be maintained around the discovery to provide for the total security, protection, and integrity of the human skeletal remains, in accordance with Washington State Law. No persons other than the proper law enforcement personnel, professional archaeologists, King County Historic Preservation Program (HPP) staff, and the SHPO shall be authorized direct access to the discovery location after the area is secured. If the remains are determined to be of Native American ancestry through consultation with law enforcement and the SHPO, tribal access shall be allowed when the affected tribe(s) representative(s) are designated. Coordination

for tribal member access must go through the designated tribal representative. The strict control of a burial location is mandated to insure the safety and integrity of the burial feature and remains.

- B. King County staff and its contractors and subcontractors are responsible for taking appropriate steps to protect the discovery. A 50-foot diameter area shall be secured to provide for the total security, protection, and integrity of the resource. Vehicles, equipment, and unauthorized personnel shall not be permitted to traverse or enter the discovery site.
- C. Following the specific guidance set forth here, the DCHS Project Manager shall immediately verify that a local law enforcement official (King County sheriff or police department) has been contacted and shall insure an individual competent and qualified to identify human skeletal remains is present. The ethnic origin or ancestry of the discovered human remains shall be determined through consultation with a professional archaeologist, HPP, SHPO, King County Medical Examiner and the affected tribe(s). The local law enforcement official may arrange for a representative of the King County Medical Examiner's office to assist in the examination of the discovery and shall together determine whether it should be treated as a crime scene, a historic Euro-American burial, or as a burial of Native American ancestry.
- D. If the human skeletal remains are determined to be Native American, the participating parties shall consult to determine what treatment is appropriate for the human remains. At this point, if the Tribes request it, HUD shall assume all authority over the government-to-government consultation process.
- E. In the event that any human remains are discovered and they are determined to be of Native American origin, the affected Native American Tribe(s) shall be immediately notified by DCHS.
- F. If disinterment of Native American human remains becomes necessary, the consulting parties, which shall include the DCHS, HPP, SHPO and affected tribe(s), shall jointly determine the final custodian of the human skeletal remains for reinterment.
- G. DCHS and/or HUD shall make a good faith effort at accommodating requests from the affected tribe(s) to be present after they are notified of discoveries, and prior to the implementation of mitigation measures related to the human remains.

3. DISCOVERY OF CULTURAL RESOURCES

If construction activities cause disturbance to underground cultural/archaeological resources, the following section establishes provisions for the professional archaeological treatment of cultural materials discovered during usual construction activities.

Provisions of the Cultural / Archaeological Resource Procedures are as follows:

- A. If DCHS any of its employees, contractors or subcontractors believes that he or she has uncovered any cultural resource at any point in the project, all work adjacent to the discovery shall cease immediately and the DCHS Project Manager contacted. DCHS Project Manager shall immediately notify Tom Minichillo, County Archeologist, King County Roads Division at (206) 296-8085. He shall assist in determining whether actual resources have been encountered. If such a

determination has been made, he shall immediately notify the appropriate officials, including the State Department of Archaeology and Historic Preservation and the relevant tribe(s). A cultural resource discovery could be prehistoric or historic and consist of:

- areas of charcoal or charcoal-stained soil and stones;
 - stone tools or waste flakes (i.e. an arrowhead, or stone chips);
 - bones, burned rocks or other food-related materials in association with stone tools or flakes; and/or
 - a cluster of tin cans or bottles, logging or agricultural equipment older than 50 years.
- B. In order to protect the integrity of a discovery, DCHS shall take appropriate steps to protect the discovery site by ceasing all work within a 30-foot radius to provide for the total security, protection, and integrity of the resource. Vehicles, equipment and unauthorized personnel shall not be permitted to traverse the discovery site. Work in the immediate area shall not resume until treatment of the discovery has been completed following provisions for treating archaeological/cultural material as set forth in this document. All communications between DCHS and any agency on cultural resource issues shall go through the DCHS Project Manager.
- C. Mr. Minichillo or an assigned representative, will contact HPP who shall assist in determining on site whether actual historic resources or human remains have been encountered. If such a determination is made or if the finding is unclear, the appropriate agencies will be contacted to report any unanticipated discovery of cultural resources. All material shall be treated as potentially eligible for listing in the NRHP. HPP shall contact the affected tribe(s) and inform them of the unanticipated discovery. Construction shall be halted within the immediate area of the discovery and the scene shall be protected until consultation to determine the appropriate course of action has been conducted.
- D. Archaeological deposits discovered during construction shall be assumed eligible under criteria D for inclusion in the NRHP for the purposes of Section 106 compliance, in accordance with 36 CFR 800.13(c).
- E. Where cultural resources are encountered during construction, but additional project effects to the resources are not anticipated, project construction may continue while documentation and assessment of the cultural resources proceeds. Continued construction shall be conducted to the extent that no additional impacts to resources shall take place. The total area of work stoppage shall be adequate to provide for the security, protection and integrity of the discovery in accordance with Washington State Law. Construction may continue at the discovery location only after the process outlined in this plan is followed and the SHPO is satisfied that the Section 106 caveats have been met.
- F. Routine documentation of newly discovered cultural material should not impact construction schedules. Where complex or extensive cultural remains are encountered, the DCHS Project Manager, HPP staff and professional archaeological personnel shall determine the appropriate level of documentation and treatment of the resource after consultation with SHPO and affected tribal representatives.
- G. Non-intrusive field documentation of all human remains shall be undertaken immediately. All prehistoric and historic cultural material discovered during project construction shall be

professionally recorded on a State of Washington cultural resource site or isolate form using standard techniques. Site overviews, features, and artifacts shall be photographed; stratigraphic profiles and soil/sediment descriptions shall be prepared for any subsurface exposures. Discovery locations shall be documented on scaled site plans and site location maps.

- H. Cultural features, horizons and artifacts detected in buried sediments may require further evaluation using hand-dug test units to clarify aspects of integrity, stratigraphic context or feature function. Units may be dug in controlled fashion to expose features, collect radiocarbon or animal/plant macrofossil samples from undisturbed contexts, or interpret complex stratigraphy. A test excavation unit or small trench might also be used to cross-section a feature to determine if an intact occupation surface is present. Test units shall be used only when necessary to gather information on the nature, extent, and integrity of subsurface cultural deposits to evaluate the site's potential to address significant research domains. Excavations shall be conducted using accepted techniques for controlling provenience of recovered remains.
- I. Sediments excavated for purposes of cultural resources investigation shall be screened through 1/8-inch mesh. Spatial information, depth of excavation levels, natural and cultural stratigraphy, presence or absence of cultural material and depth to sterile soil, regolith, or bedrock shall be recorded on a standard form. Test excavation units shall be recorded on unit level forms, which include plan maps for each excavated level and material type, number, and vertical provenience (depth below surface and stratum association where applicable) for all artifacts recovered from the level. Radiocarbon and macrofossil samples shall be taken from intact subsurface features exposed by shovel/auger probes or test units. A stratigraphic profile shall be drawn for at least one wall of each test excavation unit.
- J. All prehistoric and historic artifacts collected from the surface and from probes and excavation units shall be analyzed, catalogued, and temporarily curated by King County. Ultimate disposition of cultural materials shall be determined in consultation with the SHPO and the affected tribe(s).
- K. Within 90 days of concluding fieldwork, a management summary describing any and all monitoring and resultant archaeological excavations shall be provided by DCHS to HPP, SHPO and the affected tribe(s).
- L. If assessment activity exposes human remains (burials, isolated teeth, or bones) all defined procedures outlined in Part 2 above shall be followed.
