## D.1.1 Overview

IDIS allows users to download data – called *data extracts* -- from IDIS database tables. Users can extract data in 17 categories on the Data Download Selection (C04MU19) screen (see Section 12.4).

The next section provides an alphabetic cross reference of all files. The sections that follow, describing each of the 17 categories, are listed in the same order that they appear on the C04MU19 screen.

In addition to the data extracts available on the Data Download Selection (C04MU19) screen, the second page of the IDIS Report Selection screen (C04MU15) lets users run financial extracts for the CDBG, HOME, ESG, and HOPWA programs. Even though these extractions appear under the Report Selection, they function as data extracts and are described in this chapter.

## D.1.2 Alphabetical Data File List
