

IDIS RELEASE NOTES FOR VERSION 6.4.1

The following IDIS item is expected to be released to production as IDIS Version 6.4.1 the evening of Thursday, September 6, 2001 and available for use on Friday morning, September 7, 2001.

1. DATA DOWNLOADS

Problem: Currently, when a grantee with subrecipients (for example, a state) downloads grant and draw transaction records, the files do not include third-level subgrant data and may not include all transactions either initiated by the grantee or under the control of the grantee.

Solution: Under Version 6.4.1, the grant and draw transaction download files now include appropriate third-level subgrant data and all appropriate transactions.
