Affirmative Fair Housing Marketing Plan
Attachment 6b.

Attached to this AFHMP is a copy of an internal memorandum given to all staff members. In addition, there is a copy of the internal Certification of Completion form that indicates all training that each new employee is required to complete. This training is also completed once per year.

This training includes:

Fair Housing – specifically compliance with:
  - Fair Housing Act
  - Affirmative Fair Housing Marketing Plan
  - Title VI of the Civil Rights Act
  - Section 504 of Rehabilitation Act of 1973

OSHA
Non-Discrimination and Anti-Harassment
Substance Abuse
Mold
Lead Based Paint (if applicable)
Asbestos (if applicable)

In addition, all employees are given one-on-one training with their immediate supervisor for at least one week. This training includes: SPM Policies and Procedures, Fair Housing Regulations, OSHA Safety Regulations, and the contents of the AFHMP.

All office staff attends annual FAHSA or SAHMA meetings, both of which offer Fair Housing training; and maintenance staff attend an annual Maintenance Workshop that includes Fair Housing training.

Each site is provided with written Fair Housing Materials that remain on site, as well as the NAHMA Fair Housing Guidebook.
DIOCESE OF VENICE
ADOPTED FAIR HOUSING POLICIES

HUD SECTION 202 PROJECTS
EQUAL HOUSING OPPORTUNITY

It is the policy of the apartment complex and Managing Agent to comply with any and all Federal, State or local law prohibiting discrimination in housing on the grounds of race, color, sex, religion, familial status, handicap, or national origin, including Title VI of the Civil Rights Act of 1964 (Public Law 88-352, 78 State, 241), all requirements imposed by or pursuant to the Regulations of the Secretary (24 CFR, Subtitle A, Part 1) issued pursuant to that Title; regulations issued pursuant to Executive Order 11063, and Title VIII of the 1968 Civil Rights Act.

In this Chapter

Employment.................................2

Equal Housing Opportunity Poster .........................2

Advertising..................................2

Fair Housing Amendments Act of 1988 ..........................2

Section 504 of the Rehabilitation Act of 1973....................4

Reasonable Accommodation Procedures..........................5

Reasonable Accommodation Policy ...............................7
Employment

The Community and Managing Agent are Equal Opportunity Employers and presently have minorities employed at various levels of responsibility. All hiring will be in conformance with equal employment opportunity requirements. The NOTICE TO ALL EMPLOYEES (accessed via SPM website) must be posted in the rental office in a place where all employees can easily read.

Equal Housing Opportunity Poster

This poster (obtained through the HUD Office) must be framed and posted in a conspicuous place in the rental office of every complex. This poster announces to everyone that visits your office that discrimination is prohibited.

Advertising

(1) Signs

All rental signs and entrance signs must have the Fair Housing logo and the words "Equal Housing Opportunity" printed on them.

(2) Advertising

All newspaper ads, brochures, flyers, and other forms of advertising must have the Equal Housing logo and wording.

Fair Housing Amendments Act of 1988

Title VIII of the Civil Rights Act of 1968 as amended by the Fair Housing Amendments Act (FHAA) of 1988 prohibit discrimination against persons with handicaps and provide equal opportunities to persons with handicaps.

Discriminatory Practices prohibited by the Fair Housing Amendments:

The regulations list specific examples of prohibited, and unlawful practices. Note: the "Δ" as used below indicates a similar provision in 504. Where both laws apply, providers should use the more stringent of the two requirements. Below is an edited excerpt from the regulations.

You cannot, because of race, color, religion, sex, handicap, familial status, or national origin

- Refuse to sell or rent to a person who has made a bona fide offer;

Equal Housing Opportunity (A) October 1, 2007 2
Discriminate in the terms, conditions or privileges, of the sale or rental, or in the provision of services or facilities in connection with the sale or rental;

• Use advertising for sale or rent that indicates a preference or limitation based on a protected class;

• Misrepresent the availability of a unit;

• Engage in blockbusting;

• Impose different sale or rental charges;

○ Use different qualification criteria or applications, or sale or rental standards or procedures such as income standards, application requirements, application fees, credit analysis, or sale or rental approval procedures, or other requirements;

○ Use different provisions in contracts of sale or leases such as those relating to rental charges, security deposits, terms of the lease, closing or down payment requirements;

○ Fail or delay maintenance repairs of sale or rental dwellings;

○ Limit the use of privileges, services, or facilities associated with the dwelling unit;

• Deny or limit services or facilities in connection with the sale or rental because a person failed or refused to provide sexual favors;

○ Restrict choices or a person by word or conduct in connection with seeking, negotiating for, buying or renting a dwelling;

○ Assign any person to a particular section of the community, neighborhood or development, or to a particular floor of a building;

○ Employ codes or other devices to segregate or reject applicants;

○ Deny or delay processing of an application.
Section 504 of the Rehabilitation Act of 1973

Owners of assisted housing, by virtue of their receipt of Federal funds, must comply with requirements of Section 504 of the Rehabilitation Act of 1973. Specifically, 504 requires that an otherwise qualified individual with handicaps, solely by reason of his/her handicap, cannot be excluded from participation in any program or activity receiving Federal financial assistance. Nor can such persons be denied the benefits of, or be subject to discrimination under any program or activity receiving Federal financial assistance.

504 is concerned with both discriminatory behavior and access to benefits and facilities of programs. To comply with the law, action must be taken to address accessibility issues in four broad areas:

- Communication and information (including the issuance of required notices of non-discrimination): provision of auxiliary aids where necessary to afford an individual with handicaps equal opportunity to participate in the program or activity;

- Personnel administration (policies and procedures);

- Housing administration (policies, procedures, and practices, especially Resident Selection Plans, marketing plans, lease & house rules);

- Creating access to housing and non-housing facilities and any related services.
Reasonable Accommodation Procedures

In addition, the community may perform structural modifications to housing and non-housing facilities on sites where such modifications would be necessary to afford full access to the housing program for qualified individuals with handicaps.

In reaching a reasonable accommodation with, or performing structural modifications for, otherwise qualified individuals with handicaps, the Property is not required to:

- Make structural alterations that require the removal or altering of a load bearing structural member;
- Provide an elevator in any multifamily housing community solely for the purpose of locating accessible units above or below the grade level;
- Provide support services that are not already part of its housing programs;
- Take any action that would result in a fundamental alteration in the nature of the program or service;
- Take any action that would result in an undue financial and administrative burden on the Property (including structural impracticality as defined in the UFAS).

All actions, communications, access to facilities, access to units, management policies and employment policies must insure equal access and treatment for handicapped persons. This requires awareness and sensitivity by all complex staff – in some cases a dramatic change in organizational behavior must occur.

An evaluation of your property, as well as a Transition Plan for any physical modifications needed to make all common areas barrier-free, has been completed and is located in your Fair Housing/504 Notebook on-site. Your Transition Plan may have called for such items as lever-type door handles on all common area doors, handicap parking spaces with ramps, signs and lettering, ramps to doorways, etc.

On the following page you will find the Reasonable Accommodation Policy. It will need to be thoroughly reviewed with all staff members and posted on the complex office bulletin board. It is important that you follow this policy consistently.

The Reasonable Accommodation Policy states that upon request, we will provide reasonable accommodations to applicants and/or residents who qualify for them. A Reasonable Accommodation Request form, as well as a Reasonable Accommodation verification Form, are located in Yardi and can be accessed on the Family Info button on the 50059. They are also accessible via the SPM web-site.

If there is an applicant and/or resident that has an obvious disability and an obvious need for a reasonable accommodation (i.e. a wheelchair user asks for a ramp), there is
no need to verify this need. However, this information would still need to be documented at the bottom of the Reasonable Accommodation request Form.

All reasonable accommodation requests should be sent to your Regional Property Manager for approval or denial. If the Regional Property Manager denies the request, she will forward the request to the Regulatory Director for final review. We want to remind you to make sure your resident/applicant realizes that the request will be processed through the corporate office for final approval.

It is imperative that all requests for a Reasonable Accommodation be handled as quickly as possible. Once you have received a request, you have 2 business days to submit the verification form to the appropriate third party (if required). After that form has been mailed, you are responsible for tracking that form and following up with the recipient to be sure it is returned to your office as quickly as possible. Once you have received this third party verification form, you are required to submit this information to your Regional Property Manager within 24 hours of receipt. If you do not have a verification form because the disability and need for the accommodation is obvious, you should submit the request form immediately to your Regional Property Manager for approval.

It is important that all requests (whether denied or approved) be maintained in a separate file in your complex office labeled “Reasonable Accommodations” for easy access in the future. You should also place a copy in the resident file.

In the case of a resident or applicant who has request a live-in aide, you will need to follow all of the above steps. In addition, the individual who is requesting to be the live-in aide will need to complete an application. The purpose of this application is to acquire the information required for screening purposes. Once the application is returned, it will need to be run through Rent Grow just as all other applications are. DISREGARD the credit information and complete the criminal search request on the live-in aide. We do not have access to the criminal database unless a credit report is run. This is the only reason that you are completing the credit portion of the screening. All live-in aides should meet the same screening criteria with regard to criminal background as applicants. Should the live-in aide have a criminal history that would make them ineligible, they will not be permitted to be a live-in aide.

Again, any requests that are denied must be run through your Regional Property Manager and the Regulatory Director prior to denial. Please note that with Change 2 to the HUD 4350.3 in a 202 Property with Section 8 assistance (not a PRAC), adult children can be added as a household member after initial occupancy if they are essential to the well-being and care of the elderly parent. They are no longer considered a live-in aide. They would be required to sign a form stating that they understand that they do not have the right to remain in the unit if the elderly parent no longer resides there. This form is on the SPM Website.

In addition, with Change 2 to the HUD 4350.3 if a resident has to be transferred to another unit because of a reasonable accommodation, the community could be responsible for the cost of the move. All requests for reasonable accommodations must be reviewed by your Regional Property Manager and the Regulatory Director.
Reasonable Accommodation Policy

This Complex is an Equal Housing Opportunity provider and does not discriminate against our applicants/residents with disabilities. It is our policy to provide reasonable accommodations to our applicants/residents with disabilities to enable them to fully use and enjoy this community. This includes structural modifications and/or exceptions to our usual rules or policies. In general, the following steps should be taken to assure that your request for a reasonable accommodation is adequately responded to. If you are unable or unwilling to complete any of the following steps, please notify the manager immediately, and we will handle your request individually.

- Applicant/Resident to fill out and return to the Complex Office the Reasonable Accommodation Request Form

- Applicant/Resident to sign the Reasonable Accommodation Verification Form and return it to the Complex Office. This form need not be signed and sent to a qualified third party verifier in the following instance:

  - If disability is obvious or can be properly verified with credible documentation provided from requesting applicant/resident AND
  - If need for requested accommodation is obvious or can be properly verified with credible documentation provided from requesting applicant/resident

- Upon receipt of the Reasonable Accommodation Verification Form from the applicant/resident, management will mail the form to the appropriate third party as noted on the Request Form

- When third party verification is received, management will review the form and will notify the applicant/resident in writing of the determination made regarding the request after final review has been made at the corporate level

- All request and verification forms will be maintained in a separate file labeled "Reasonable Accommodations" in the Complex Office. An additional copy may also be kept in each applicant/resident file

Please contact the manager if assistance is needed with this process.

RE-SUBMISSION OF PREVIOUSLY SUBMITTED INFORMATION

Per the HUD notice of funding under the Application Submission Requirements, it states that "... you will be able to submit information and exhibits you have previously prepared for prior applications under Section 202, Section, or other funding programs. Examples of exhibits that may be readily adapted or amended to decrease the burden of application preparation include, among others, those on previous participation in the Section 202 or Section 811 Programs, your experience in provision of housing and services, supportive service plan, community ties, and experience serving minorities.

In this section, we are including updated support letters, along with support letters previously submitted."

Dear Friends,

I would like to share with you some of the areas that I have requested that our different Councils and Committees assist me with.

The Liturgy Committee: The study and dissemination of the teaching of Pope Benedict XVI's Post-Synodal Apostolic Exhortation Sacramentum Caritatis as well as the General Instruction of the Roman Missal.

Parish Council: Review of 2003 Parish Strategic Plan, begin the process of development of an updated strategic pastoral plan using a means such as Envision (See www.participating.org) or other instrument of pastoral planning; establishment of a Vocation Committee, conduct a study of the use of current meeting space, ongoing development of Hispanic Ministry, study of books “From Maintenance to Missions” and “Eucharist: Source and Summit” and the participation in the Diocesan Multi-year catechetical process announced by the bishop, and assist with ongoing maintenance and building upkeep.

School Board, Finance Council, PTO, and School Finance Committee assist with: the establishment of a Monsignor Lawrence Higgins Tuition Assistance Fund, the analysis of school safety, the implementation of the strategic plan, and the ongoing implementation of a long range plan for finance and development of our school.

I will strive to keep you updated regarding the progress of the items mentioned above.

I want to announce that beginning with the celebration of the Assumption of Mary we will have a Vigil Mass.

The schedule for the Holyday will be:
Tuesday, August 14 Vigil, 7:00 p.m. (English)
Wednesday, August 15 with 6:30 & 8:30 am.
12:15 & 5:00 p.m. in English and 7:00 p.m. in Spanish

We will continue to review this schedule to determine if it is meeting the needs of our parishioners.

Bishop Robert Lynch will formally install me as the second pastor of St. Lawrence next Saturday, August 11, 2007 at 5:30 p.m. Vigil Mass. I am thankful to Bishop Lynch and to Monsignor Higgins, who continues to serve as a teacher and a guide regarding what a good pastor and priest should be.

Sincerely yours in Christ,
Fr. Tom Morgan

**St. Lawrence - Patron of our Parish & Pastor**

**Friday, August 10th**

St. Lawrence Third-century archdeacon of Rome, distribute of aims, and "keeper of the treasures of the church" in a time when Christianity was outlawed. On August 6, 258, by decree of Emperor Valerian, Pope Saint Sixtus II and six deacons were beheaded, leaving Lawrence as the ranking Church official in Rome. While in prison awaiting execution Sixtus reassured Lawrence that he was not being left behind; they would be reunited in four days. Lawrence saw this as an opportunity to disperse the material wealth of the church before the Roman authorities could lay their hands on it. On August 10th Lawrence was commanded to appear for his execution, and to bring along the treasure with which he had been entrusted by the pope. When he arrived, the archdeacon was accompanied by a multitude of Rome's crippled, blind, sick, and indigent. He announced that these were the true treasures of the Church. Furious, the prefect prepared a red-hot gridiron and bound Lawrence to it; Lawrence bore the agony with unbelievable equanimity and in the midst of his torment instructed the executioner to turn him over as he was broiled enough on one side. There is no doubt that his death inspired great devotion in Rome, which quickly spread throughout the entire Church. We pray that our Parish of St. Lawrence also inspires great devotion and love of God.

---

### 2007—2008 Church Projects Scheduled to Begin:

1. Obtaining of donated statues for the piazza
2. Obtaining of donated candlesticks for the church altar
3. Classroom improvements at the school
4. Repaving of the piazza
5. Replacement of door handles at the church
6. Repair of sills, doors and roof of the church
7. Addressing of lighting and sound system issues at the church
8. Repair of Higgins Hall roof and cleaning or replacement of half chairs
9. Replacement of worn vestments
10. Install map of buildings sign for visitors

### Projects in the Process of Completion:

1. Addressing issues of repair and upkeep at priests' residences
2. New Media Center

### Projects Completed:

1. Obtaining of hand bells for a hand bell choir

If you would like information regarding assisting with any of these projects please call Fr. Tom Morgan at (813) 875-4040.

Palmetto Youth Center
Annual Dr. King honor

The Palmetto Youth Center Board Friday will begin homage to the late Dr. Martin Luther King, Jr. with an annual Humanitarian Award Banquet followed by a Saturday parade in Palmetto, an Interracial Religious Service Sunday.

Also as part of honors for the late civil rights leader, oratorical presentations will be made by middle school and high school students, and youth groups will perform at the center prior to the religious services.

To be honored at the 12th annual Humanitarian Award Banquet at the Youth Center at 7 p.m. Friday for their contributions to "interracial harmony and multicultural understanding" are Otell Ackerman, E.D. "Moody" Johnson, Mrs. Joyce Kerse, Steve Knopik, Earl Moreland and Bradenton Mayor Wayne Poston.

Keynote speaker at the banquet will be State Sen. Lesley "Les" Miller.

The parade will begin at 2 p.m. Saturday at Lincoln Middle School, and will proceed west on 17th Street to Eighth Avenue, West, then south on Eighth Avenue to 10th Street, West, then east on 10th Street to Second Avenue, West, then north on Second Avenue to 17th Street, then back to Lincoln Middle School.

Rev. Rev. Ray Moody Church Mus
Rev. W.

The Interracial Religious Service will be held at the Youth Center at 501 17th Street, West from 6 p.m. to 7:30 p.m. Sunday.

Speakers will be Pastor Marcia Samose "Moody" Braden Manatee Church
Musa Church

Rev. 9/08
¿Está usted Preparado Para la temporada de Huracanes?

La Temporada de Huracanes empieza en Junio 1 y continua hasta Noviembre 30. Los meses más severos son Agosto y Septiembre. Ahora es tiempo para prepararse.

Haga un Plan:

- **Reúñase con los miembros de la familia.** Asegúrese que cada uno de los miembros de la familia entienda los peligros que amenazan a nuestra comunidad y aprenda acerca de los planes de evacuación y los refugios de emergencia. No se olvide de incluir a las personas que cuidan a niños y enfermos en su planes. Haga un inventario de lo que posee en casa y revise para estar seguro que esta cubierto por su seguro.

- **Haga un plan de comunicación con la familia.** Escoja un contacto fuera de la ciudad y notifíquele su plan de evacuación. Deje saber donde usted va a ir en una tormenta. Identifique sitios de reuniones si se llegan a separar durante la tormenta. Contacte a sus seres queridos tan pronto pase la tormenta.

- **Plan para los discapacitados y con otras necesidades especiales.** Para las personas quienes tienen cuidados especiales en la casa, es esencial tener un plan alternativo si las personas que los cuidan no pueden estar con usted. Identifique la energía que necesitan los equipos eléctricos que usa y tenga una fuente alternativa de energía para estar preparado ante cualquier contingencia.

  **Condado de Manatee Refugios para necesidades especiales.**
  Se require registro por adelantado. (941) 748-4501 ext. 3500

- **Plan para sus mascotas.** Tome sus mascotas con usted si usted evacua. Sin embargo, mascotas-amigables (perros y gatos) opciones de refugios están disponibles en el condado de Manatee, el espacio es limitado y usted debe proveer los siguiente: Historial médico y de vacunas, Jaulas con seguro, collar con cuerda, comida, galletas y abre latas manual, Recipientes para agua y comida, letrinas portátiles y arena, periódicos y bolsas plásticas para la basura juguetes y artículos de confort, Bandas y repuestos. Para mas información de refugios Mascotas-amigables ,Contacte el servicio de animales del condado de Manatee al (941) 742-5933.
Preparación para casos de desastre
Abrí una cuenta de cheques y ayudé a dar esperanza a otros.

Ahora, las cuentas de cheques de SunTrust lo benefician a usted y a su comunidad. Cuando usted abre una cuenta de cheques de SunTrust, acepta su nueva Tarjeta de Débito SunTrust Visa® y hace una compra con ella, nosotros haremos una donación de $100 a su nombre a la organización caritativa de su preferencia. O si desea, le enviaremos una Tarjeta de Regalo SunTrust por valor de $50 para utilizar a su discreción. ¿Cómo quisiera ayudar a su comunidad hoy?

Environmental Phase I Analysis

A Phase I environmental analysis was performed on the proposed site in conjunction with the published standards in this year's NOFA. The report indicated that there are no environmental conditions present which would render this site as inappropriate from an environmental standpoint. The report is attached.

RE: PHASE I ENVIRONMENTAL SITE ASSESSMENT - Church Property - Holy Cross Manor II Site - 520 26th Street West - Palmetto - Manatee County - Florida

Dear Dr. Smeryk:

Greenfield Environmental, Inc. (GE) has completed a Phase I Environmental Site Assessment (ESA) of the above referenced property located in Palmetto, Florida.

This Phase I ESA was conducted in accordance with the scope and limitations of the 2005 EPA's Final All Appropriate Inquiry (AAI) Standard (40 CFR 312) and in compliance with the American Society for Testing and Materials (ASTM) Practice E-1527-05. The Findings, Opinions and Conclusions in this Phase I ESA are based on ASTM 1527-05, Sections 12.5, 12.6 and 12.8. This report documents the environmental concerns identified on the subject site and addresses the associated risks to the environment. Greenfield Environmental acknowledges the fact that the Diocese of Venice is relying on the information contained in this Phase I ESA report to assess the environmental condition of the subject property and the scope of work was sufficient in Greenfield Environmental's opinion to uncover potential Recognized Environmental Conditions (RECs) at the subject property pursuant to the above standards. This ESA report was prepared for and is certified to the Diocese of Venice for their exclusive use. Greenfield Environmental warrants that this Phase I ESA was conducted in accordance with procedures, practices and standards generally accepted and customary in the consultant’s profession for use in similar assignments.

In the professional opinion of Greenfield Environmental, Inc. an appropriate level of inquiry has been made into the current and previous ownership and uses of the subject property consistent with good commercial and customary practices in an effort to minimize liability, and no evidence or indication of Recognized Environmental Conditions has been identified. As such, no further investigation is deemed necessary at this time (See Assessment Summary). Should you have any questions, please feel free to call us at (727)896-1266.

Respectfully submitted,
Greenfield Environmental, Inc.

RE: PHASE I ENVIRONMENTAL SITE ASSESSMENT - Vacant Property - Blessed Pope
John XXIII Church Site - 13060 Palomino Lane - Ft. Myers - Lee County - Florida

Dear Dr. Smeryk:

Greenfield Environmental, Inc. (GE) has completed a Phase I Environmental Site Assessment
(ESA) of the above referenced property located in Ft. Myers, Florida.

This Phase I ESA was conducted in accordance with the scope and limitations of the 2005 EPA’s
Final All Appropriate Inquiry (AAI) Standard (40 CFR 312) and in compliance with the American
Society for Testing and Materials (ASTM) Practice E-1527-05. This report documents the
environmental concerns identified on the subject site and addresses the associated risks to the
environment. Greenfield Environmental acknowledges the fact that the Diocese of Venice is relying
on the information contained in this Phase I ESA report to assess the environmental condition of
the subject property and the scope of work was sufficient in Greenfield Environmental’s opinion to
uncover potential Recognized Environmental Conditions (RECs) at the subject property pursuant
to the above standards. This ESA report was prepared for and is certified to the Diocese of Venice
for their exclusive use. Greenfield Environmental warrants that this Phase I ESA was conducted
in accordance with procedures, practices and standards generally accepted and customary in the
consultant’s profession for use in similar assignments.

In the professional opinion of Greenfield Environmental, Inc. an appropriate level of inquiry
has been made into the current and previous ownership and uses of the subject property
consistent with good commercial and customary practices in an effort to minimize liability,
and no evidence or indication of Recognized Environmental Conditions has been identified.
As such, no further investigation is deemed necessary at this time (See Assessment
Summary). Should you have any questions, please feel free to call us at (727)896-1266.

Respectfully submitted,
Greenfield Environmental, Inc.

1.0 ASSESSMENT SUMMARY

Based on the standardized research methods and resultant information contained within this Phase I Environmental Site Assessment, Greenfield Environmental has identified the following Recognized Environmental Conditions (RECs) in accordance with the EPA's All Appropriate Inquiry (AAI) Standard. A REC is defined by the above standard as an identified condition indicative of releases or threatened releases of hazardous substances, and in the case of inquiries conducted for persons identified in §312.1(b)(2), conditions indicative of releases and threatened releases of pollutants, contaminants, petroleum and petroleum products, and controlled substances (as defined in 21 U.S.C. 802) on, at, in, or to the subject property.

Any exceptions to, or deletions from, this practice are described in this report. This assessment has revealed no evidence of Recognized Environmental Conditions (REC's) in connection with the subject property.
2.0 INTRODUCTION

2.1 Purpose
This Phase I ESA was performed in order to assess the site for existing or threatened contamination from sources listed within this report. This Phase I ESA was performed in order to identify any Recognized Environmental Conditions (REC's) as defined within the EPA's All Appropriate Inquiry (AAI) Standard. This Phase I ESA was conducted in accordance with the scope and limitations of the 2005 EPA's Final All Appropriate Inquiry (AAI) Standard (40 CFR 312) and in compliance with the American Society for Testing and Materials (ASTM) Practice E-1527-05. This Phase I ESA was performed under the direct supervision of Environmental Professional, Mr. James E. Greenfield.

The site visit was performed on May 20, 2009 by Nick Ellerman. Mr. Ellerman holds a Bachelor of Science degree in Environmental Science & Policy from the University of South Florida. Mr. Ellerman has environmental-related work experience since 2005 and experience in assessing the risks associated with real-property transactions since 2006. The site inspection was conducted with accompaniment by Mr. James Greenfield. This Phase I ESA was performed in order to assess the site for existing or threatened contamination from sources listed in Section 8.0 of this report. See Section 13.0 for a description of the scope of work and information sources used to perform the assessment.

Work conducted during the course of this Phase I ESA was completed under the direct supervision of James E. Greenfield. Mr. Greenfield holds a Bachelor of Arts degree in Biology from the University of South Florida. Mr. Greenfield has environmental-related experience in assessing the risks associated with real-property transactions since 1989.

2.2 Detailed Scope Of Services
The site inspection consisted of visual observation and photographic documentation of the subject property, and review of the following items: environmental setting, site geology and hydrology, on-site wells, aboveground storage tanks, underground storage tanks, on-site surface waters, impoundments and other land uses, septic systems, leach beds, or other subsurface structures, drums or containers, hazardous substance or petroleum product use and storage, hazardous waste disposal / storage practices, solid or liquid waste disposal practices, a limited PCB containing transformer survey, past usage of land, aerial photograph review going back to when the subject property appeared to be virgin with no on-site structures apparent, if applicable a 50-year chain of title search, environmental lien search / publicly recorded instruments within the past 50 years, historic city directories (if available), prior environmental assessments (if available), Sanborn Fire Insurance Maps (if available); review soil surveys, Geologic Maps of Florida, USGS Quadrangle Map, walk or drive around of adjacent properties (as possible), interview(s) with one or more persons knowledgeable about present and past use of the land (readily accessible), record review of NPL sites, De-Listed NPL sites, CERCLIS sites, CERCLIS NFRAP sites, RCRA TSD sites, RCRA CORRACTS sites, RCRA Generator sites, ERNS sites, Federal / State / Tribal Institutional Control/Engineering Control Registries, State and Tribal List of Hazardous Waste facilities, State and Tribal equivalent NPL sites, State and Tribal equivalent CERCLIS sites, State and Tribal Aboveground Storage Tanks (AST) sites, State and Tribal Underground Storage Tank (UST) sites, State and Tribal Leaking Underground Storage Tank (LUST) sites, State and Tribal Landfill and or Solid Waste sites, State and Tribal Brownfields sites, State and Tribal Voluntary Cleanup sites.
and record review of state and local government environmental enforcement data bases and examination of agency files on the property and adjacent properties, review of environmental permits if disclosed by owner or operator and the assembly of the environmental assessment report, including recommendations for additional investigation (if necessary). No subsurface investigation was conducted as part of this Phase I ESA.

2.3 Significant Assumptions
It is important to note that all but an exhaustive investigation might fail to locate buried, covered over or localized surficial events of hazardous materials or wastes on-site that are not reasonably visible or suspected at the ground surface. The client should realize that the subject property, which in our opinion, did not exhibit evidence that toxic or hazardous wastes were at the ground surface during our site inspection and field work, except as qualified herein, could later be impacted due to natural phenomena, human intervention, on-site pollution sources or contamination due to adjacent properties. These occurrences are beyond our control. Greenfield Environmental assumes that there are no hidden or unapparent environmental conditions of the site, subsoil, groundwater, structures or surroundings which would have an adverse effect on the subject property whether the source is on-site, adjacent, or in the nearby surrounding. This purpose of this Phase I ESA was not to provide an operational audit of any businesses at the site, if any, which would determine their compliance with regulatory requirements that may affect them.

Information, estimates, and opinions furnished to Greenfield Environmental contained in this report, were obtained from sources that are considered and assumed to be reliable, and believed to be true and correct. Greenfield Environmental assumes no responsibility for any inaccuracies in such items which may be revealed as a result of subsequent action, either by Greenfield Environmental or others. These occurrences are beyond our control.

Any site plans or drawings show approximate dimensions and are included in this report to assist the client in visualizing the site and the surroundings, and not to give a necessarily accurate dimensional representation of the site. No survey was conducted on the subject property. Greenfield Environmental or its representative has made no agreement to give legal testimony nor to appear in court or other hearings, formal or informal, as part of the PSA with the client or any party involved with the property. The client may make separate arrangements with Greenfield Environmental for testimony required now or in the future. Conclusions drawn from the results of this assessment are limited by the methods used and do not represent a warranty that all areas within the subject property are in the same condition. All portions of this report, including the assessment summary and limitations, are an integral part of this Phase I ESA and should not be separated from any other portion of the report.

2.4 Limitations and Exceptions
Excluded from said contract is any actual physical determination or delineation of wetlands on the subject property, actual testing for radon gas on the subject property; the existence of any endangered species within the property; the location of any well field protection areas; urea formaldehyde insulation, or testing for lead within any structures on the subject property; or the existence of the "sick-building" syndrome within any structure on the subject property, determination of compliance with Activity and Use Limitations (AUL's), lead in drinking water determination, regulatory compliance, cultural and historical resources, industrial hygiene issues,
health & safety issues, other ecological issues, indoor air quality issues, determination of on-site biological agents and mold issues. This report has presented and discusses the environmental condition of the subject property as of the date of our site inspection only and does not imply that the subject property will remain in that condition in the future. Assessment of the threat of contamination from adjacent properties is limited to a non-intrusive inspection and visual observations of the adjacent properties from the subject property and surrounding or adjoining properties, and a review of the records listed. Information for this assessment was obtained through a site visit, interviews with employees at the agencies or businesses listed, and the review of documents listed.

2.5 Special Terms and Conditions
This Phase I ESA was conducted in accordance with the scope and limitations of the 2005 EPA's Final All Appropriate Inquiry (AAI) Standard (40 CFR 312), in compliance with the American Society for Testing and Materials (ASTM) Practice E-1527-05, and in accordance with procedures, practices and standards generally accepted and customary in the consultant's profession for use in similar assignments.

2.6 User Reliance
This Phase I ESA report, conducted at the above-captioned site by Greenfield Environmental was prepared for and is certified to the Diocese of Venice. Furthermore, the Diocese of Venice can rely entirely on this report as part of their due diligence process. The use of this report by an unauthorized third party is done so at their own risk.
3.0 SITE DESCRIPTION

3.1 Site Location and Legal Description

The subject property consists of the southwest section of Parcel ID #22-45-25-00-00001.0100, which is the Blessed Pope John XXIII Church Site. The subject site is approximately 3.5 acres in size and consists of vacant property. The subject site is located in a residential/church area in Section 22, Township 45, Range 25 in Lee County, Florida.

According to Lee County Property Appraiser records, the legal description is as follows:

W 1/2 OF NW 1/4 OF NW 1/4 OF SEC 22 + E 1/2 OF NE 1/4 OF NE 1/4 OF SEC 21

See Appendix II for a site plan showing the significant features of the subject property.

3.2 Site and Vicinity General Characteristics

The property is currently vacant. The immediate area of the subject site and the remainder of the parcel consists of a church, the church's maintenance shed and a retention pond. The rest of the surrounding area consists of residential development and pasture lands. Access to the subject site is via Palomino Lane.

3.3 Current Use of the Property

The property is currently undeveloped and is zoned for church usage.

3.4 Description of Structures, Roads and Other Improvements on the Property

No structures currently exist at the subject site.

Heating & Cooling Systems / Sewage Disposal / Source Of Potable Water

No suspect heating and cooling systems were viewed at the subject site. No water and/or sewage services were observed at the site.

3.5 Current Use Of the Adjoining Properties

Our representative observed the adjacent land uses during the time of the site visit by traversing the area around the property. Any facilities which typically present environmental risks such as industrial complexes, landfills, dry cleaners, and gasoline service stations were noted. These types of facilities can discharge contaminants which may migrate to neighboring properties.

The adjoining property to the north and east consist of church property. A maintenance structure and a retention pond currently exist along the east boundary of the subject site. The adjoining property to the south consists of a residential property. The adjacent properties to the west (across Apoloosa Lane) consist of residential properties.

Photographs of the subject property and its surroundings are included as Appendix III.
4.0 USER PROVIDED INFORMATION

4.1 Title Records
No 50-year Chain of Title documentation for the subject property was provided by our client, Diocese of Venice, in order to determine past owners of the site and to reveal publicly recorded ownership of the property.

4.2 Environmental Liens or Activity and Use Limitations (AUL's)
As part of the User Information requirements for this Phase I ESA, environmental lien search documentation for the subject site was generated by the law offices of Divito & Higham, P.A. and forwarded to GE on June 3, 2009. This documentation found no evidence of environmental liens at the subject site. A copy of this documentation can be found in Appendix IV.

4.3 Specialized Knowledge
Pursuant to ASTM E 1527-05, user supplied information in the form of a User Questionnaire, was forwarded to Greenfield Environmental. This questionnaire can be found in Appendix VI. The questionnaire was completed by Reverend Robert Tabbert, and did not reveal any issues that would indicate Recognized Environmental Conditions (REC's). The user has not disclosed any specialized knowledge pertaining to the subject property or surrounding areas or properties that might be material to identifying any Recognized Environmental Conditions in connection to the subject site.

Prior Assessment Activities
No previous assessments were discovered for the subject property.

4.4 Commonly Known or Reasonably Ascertainable Information
No other significant information pertaining to the subject site was discovered during this Phase I ESA which would be indicative of a potential release or threatened release.

4.5 Valuation Reduction for Environmental Issues
The prospective property owner has not disclosed any information regarding the relationship of the purchase price for the property to its fair market value based on any contamination issues.

4.6 Owner, Property Manager, and Occupant Information
Greenfield Environmental interviewed Reverend Robert Tabbert, in order to collect additional information concerning historical and present uses of the subject property. He stated that he was not aware of any previous spills at the subject property (see Section 4.3). He stated that he was unaware of any open citations or violations of an environmental nature concerning the subject site. In addition, he was unaware of any environmental liens.

4.7 Reason for Performing Phase I ESA
This Phase I ESA is being conducted in conjunction with the potential purchase of the subject site by the Diocese of Venice. This Phase I ESA was performed in order to assess the subject property for existing or threatened contamination from the sources listed within this report.

4.8 Other
Please refer to Section 4.7.
5.0 RECORDS REVIEW

5.1 Standard Environmental Record Sources
Records from regulatory and enforcement agencies from Federal, State, Tribal, Regional and Local County agencies were obtained regarding information, registrations, investigations, violations, spills, complaints or enforcement actions relating to subject property, adjacent properties and for properties within a 1-mile radius of the subject property’s approximate location. All distances of the sites listed in the database report, in relation to the subject site, are approximations.

FirstSearch Technology Corporation (FirstSearch) located in Dedham, Massachusetts was engaged by Greenfield Environmental to review several data base lists which are generated by the FDEP and the USEPA which identify and locate facilities that are regulated or tracked by the FDEP and the USEPA; and ones which may transport, store, generate, treat or dispose of hazardous substances and wastes. The information from these various lists, each identified facility with a USEPA or FDEP designation that was within a 1-mile radius of the subject property’s approximate location was then plotted on an area map. The environmental records mentioned above are the Standard Environmental Record Resources that are listed within the EPA's AAI standard and the ASTM E1527-05 practice. The above data search can be found in Appendix V of this report.

NPL Sites
The USEPA's National Priorities List (NPL) was checked for any sites on the subject property or adjoining properties. The NPL is a national list of abandoned or uncontrolled hazardous waste sites which have been scored by USEPA according to a hazard ranking system that assesses the health and environmental threat posed by sites with confirmed contamination. The NPL is used by the USEPA to prioritize sites scheduled for cleanup action.

Subject Property
The subject property is not currently identified as a NPL site.

Surrounding Properties / 1-Mile Radius
No NPL sites are located within a 1-mile radius of the subject property.

De-Listed NPL Sites
The USEPA's De-Listed National Priorities List (NPL) was also checked for any sites on the subject property or adjoining properties which have been removed from the above data base.

Subject Property
The subject property is not currently identified as a De-Listed NPL site.

Surrounding Properties / 1/2-Mile Radius
No De-Listed NPL sites are located within a 1/2-mile radius of the subject property.

CERCLIS and CERCLIS NFRAP Sites
The CERCLIS (Comprehensive Environmental Response, Compensation, and Liability Index System) is a list of sites that the USEPA is investigating for an existing or potential release of hazardous substances. However, USEPA advises that the list contains only those sites that have been brought to the attention of USEPA, and therefore, it cannot claim that the list contains all
potential hazardous waste sites that may exist. CERCLIS NFRAP sites are CERCLIS Sites that may still be contaminated, however, the EPA has No Further Remedial Action Planned for these sites.

Subject Property
The subject property is not currently identified as a CERCLIS or CERCLIS NFRAP site.

Surrounding Properties / 1/2-Mile Radius
No CERCLIS or CERCLIS NFRAP sites are located within a 1/2-mile radius of the subject property.

RCRA TSD Sites
The RCRA TSD list is a USEPA data base which stores records and information on facilities which Treat, Store or Dispose of hazardous waste and substances.

Subject Property
The subject property is not currently identified as a RCRA TSD site.

Surrounding Properties / 1-Mile Radius
No RCRA TSD sites are located within a 1-mile radius of the subject property.

RCRA CORRACTS Sites
The USEPA RCRA CORRACTS is a USEPA data base which identifies hazardous waste handlers with RCRA corrective action activity.

Subject Property
The subject property is not currently identified as a RCRA CORRACTS site.

Surrounding Properties / 1-Mile Radius
No RCRA CORRACTS sites are located within a 1-mile radius of the subject property.

RCRA Generator Sites
The Resource Conservation and Recovery Act Index System list (RCRIS) is a federal data base maintained by the USEPA containing information regarding RCRA (Resource Conservation and Recovery Act) facilities which generate and transport hazardous waste, and facilities which treat, store or dispose such waste. Inclusion on RCRIS does not necessarily indicate contamination, but rather the potential for contamination due to the presence and handling of hazardous substances.

Subject Property
The subject property is not currently identified on the USEPA RCRA Generator list.

Surrounding Properties / 1/4-Mile Radius
No USEPA RCRA Generator sites are located within a 1/4-mile radius of the subject property.

RCRA NLR Sites
The USEPA RCRA NLR is a USEPA data base of facilities not currently classified by the EPA but are still included in the RCRIS database. Reasons for non-classification include:
- Failure to report in a timely manner.
- No longer in business.
- No longer in business at the listed address.
- No longer generating hazardous waste materials in quantities which require reporting.

Subject Property
The subject property is not currently identified on the USEPA RCRA NLR list.

Surrounding Properties / 1/4-Mile Radius
No RCRA NLR sites are located within a 1/4-mile radius of the subject property.

Federal Institutional Control / Engineering Control Registries
Institutional Controls or Engineering Controls that have been recorded in public property records due to the presence of on-site contamination or likely presence of on-site contamination due to historical activities or operations on the subject site are contained within this database.

Subject Property
The subject property is not currently identified within any Institutional Control or Engineering Control Registries.

Surrounding Properties / 1/2-Mile Radius
No Institutional Control or Engineering Control Registries sites are located within a 1/2-mile radius of the subject property.

ERNS Sites
The Emergency Response Notification System is a USEPA data base which stores records and information on facilities which have had reported spills or releases of oil and hazardous substances.

Subject Property
The subject property is not currently identified in the USEPA ERNS list.

Surrounding Properties / 1/4-Mile Radius
No USEPA ERNS sites are located within a 1/4-mile radius of the subject property.

State / Tribal / Local / Regional Records Reviewed
The following reference sources are published by the Florida Department of Environmental Protection and were reviewed by Greenfield Environmental:
- Registered Storage Tank list
- Leaking Registered Storage Tank list
- State Spills 90 list
- State/Tribal list
- Solid Waste or Landfill Facilities list
- Registered Drycleaning Facilities list
- Florida Drycleaning Solvent Cleanup Program Priority Ranking list
- Voluntary Cleanup Sites list
- Brownfield Sites list
These reports generally present information regarding industrial or commercial facilities and the presence or potential for contamination due to hazardous substances / wastes or petroleum products.

**Subject Property**
The subject site was not found on the State Registered Storage Tank list.

**Surrounding Properties / 1/4-Mile Radius**
No State Registered Storage Tank sites are located within a 1/4-mile radius of the subject property.

**Subject Property**
The subject site was not found on the Leaking State Registered Storage Tank list.

**Surrounding Properties / 1/2-Mile Radius**
No Leaking State Registered Storage Tank sites are located within a 1/2-mile radius of the subject property.

**Subject Property**
The subject site was not found on the State Spills 90 list.

**Surrounding Properties / 1/4-Mile Radius**
No State Spills 90 sites are located within a 1/4-mile radius of the subject property.

**Subject Property**
The subject site was not found on the State/Tribal Sites list.

**Surrounding Properties / 1-Mile Radius**
No State/Tribal sites are located within a 1-mile radius of the subject property.

**Subject Property**
The subject site was not found on the Solid Waste Facilities list.

**Surrounding Properties / 1/2-Mile Radius**
No Solid Waste Facilities sites are located within a 1/2-mile radius of the subject property.

**Subject Property**
The subject site was not found on the Registered Drycleaning Facilities list.

**Surrounding Properties / 1/4-Mile Radius**
No facilities were found to be on the Registered Drycleaning Facilities list within a 1/4-mile radius of property.

**Subject Property**
The subject site was not found on the Florida Drycleaning Solvent Cleanup Program Priority Ranking list.
Surrounding Properties / 1/4-Mile Radius
No facilities were found to be on the Florida Drycleaning Solvent Cleanup Program Priority Ranking list within a 1/4-mile radius of property.

Subject Property
The subject site was not found on the State Engineering Controls site list.

Surrounding Properties / 1/2-Mile Radius
No State Engineering Controls sites are located within a 1/2-mile radius of the subject property.

Subject Property
The subject site was not found on the local county Brownfield list.

Surrounding Properties / 1/2-Mile Radius
No Brownfield sites were found to be on the local county Brownfield list within a 1/2-mile radius of property.

Subject Property
The subject site was not found on the State Other sites list.

Surrounding Properties / 1/4-Mile Radius
No State Other sites are located within a 1/4-mile radius of the subject property.

Review of Pertinent Regulatory Files
Files were reviewed at the Florida Department of Environmental Protection (FDEP) Southwest District Office and/or the Data Management System maintained by the FDEP (OCULUS) to determine the potential threat of contamination from the facilities in closest proximity to the subject property due to the migration of hazardous materials / wastes or petroleum products in the groundwater or soil. Files reviewed revealed the following information:

The sites listed on the FirstSearch Radius Search were either too distant from the subject site or located in a down-hydrologic gradient direction, and are therefore not believed to represent Recognized Environmental Conditions (RECs).

5.2 Additional Environmental Record Sources
No additional records sources were discovered in the scope of this assessment.

Abandoned Dump Site: Greenfield Environmental discovered no evidence during the course of this Phase I ESA to indicate the presence of an abandoned dump site on or adjacent to the subject property.

5.3 Physical Setting
The elevation of the site is approximately twenty (20) feet above sea level and the groundwater flow appears to be to the west. The surface topography in the area consists of a level grade. Various surface and subsurface features, groundwater withdrawals and seasonal fluctuations in rainfall can affect groundwater depth and direction.
The N.R.C.S. National Cooperative Soil Survey (Web Soil Survey 2.0) identifies the soils in the area of the subject property as Pomano, Immokalee and Malabar fine sands. A copy of the soil map can be found in Appendix IV.

Hydrology / Groundwater Characteristics
Groundwater flow direction in the surficial aquifer generally conforms with area topographic relief. Discharge areas are generally in creeks, lagoons, intercostal waterways, bays and nearby wetlands. Groundwater recharge within the surficial aquifer occurs primarily from downward infiltration of precipitation. The water table of the surficial aquifer is typically located at depths ranging from 1 foot to 4 feet below land surface, however, the water table may be influenced by occurrences such as local rainfall, pumping, and drainage control measures implemented by the Southwest Florida Water Management District.

Based on the 15 km E of Cape Coral, Florida U.S.G.S. Quadrangle Map (photorevised 1990) as shown in Appendix IV, the elevation of the site is approximately 20 feet above sea level. The direction of groundwater flow in the surficial aquifer is most likely to the west, based on the U.S.G.S. Quadrangle Map.

5.4 / 5.5 Historical Use Information on the Subject Property / Adjoining Properties
Aerial Photograph Review
Aerial photographs were examined for the purpose of determining whether the property and adjacent properties have been used for industrial or landfill purposes, if any obvious detrimental uses of the subject property could be ascertained and to observe development trends in the area. Aerials dated 1998, 2000, 2001, 2002, 2005, 2006, 2007 and 2008 were available for review at the Lee County Property Appraiser Aerial website. A copy of the 2008 aerial photograph is provided in Appendix IV of this report.

1998-2002: The subject property appears to be vacant farmland in the 1998 to 2002 aerial photographs. Several small structures appear adjacent to the east of the subject site in these aerial photographs. The largest visible structure still exists at the site as the church's maintenance garage. All adjacent properties appear as vacant or residential lots.

2005: The church structure and large retention pond east of the subject site first appears in the 2005 aerial photograph. The subject site appears as a vacant lot.

2006-2008: The Memorial Gardens to the north of the subject site first appear in the 2006 aerial photograph. The subject site and all surrounding properties appear much as they did in the 2008 aerial photograph. No suspect subject site or adjacent land uses were viewed in any of the aerial photographs reviewed.

After close examination of all the aerials listed above, it was concluded that there is no evidence of dumping and or landfill activity associated with the subject property or adjacent properties in the vicinity. The subject site appears to have been vacant land as early as 1998.
Sanborn Fire-Insurance Map Review
An extensive on-line collection of Sanborn Maps is available through the Florida Public Library System. Sanborn Fire Insurance Maps were used by insurance companies to determine potential fire hazards for specific buildings. This was accomplished by color coding building construction, labeling automatic sprinkler systems, fire hydrants, and gas tanks as well as facilities that may contain other flammable liquids.

This research revealed that no Sanborn maps were available for the subject property.

The above historical resource was researched and indicated that the subject site was not included in coverage for any Sanborn Maps; this can attributed to a Data Gap. The environmental significance of this Data Gap is considered to be minimal and not indicative of a potential release or threatened release.

Historical City Directory Review
Greenfield Environmental reviewed historical Polk County/City Directories (since 1977) at the Lee County Public Library located in Ft. Myers, Florida. Address listings for the subject site were as follows:

1977-2008: In the 1977 city directory, Palamino Lane first appears, but contains only 4-digit listings. The first 5-digit listings for Palamino Lane appear in the 1987 city directory. The first listing for the subject site appears in the 2005 directory, as the Blessed Pope John 23rd Church. No listings for the subject site were discovered prior to the 2005 directory. The surrounding area consisted of residential listings in the 1977 to 2008 city directories. No suspect environmental listings were viewed for the subject site or adjacent properties.
6.0 SITE RECONNAISSANCE

6.1 Methodology and Limiting Conditions
The site inspection and reconnaissance was conducted on May 20, 2009 by Environmental Professional (EP) Nick Ellerman. The EP traversed all readily accessible portions of the subject property. It is important to note that all but an exhaustive investigation might fail to locate buried, covered over or localized surficial events of hazardous materials or wastes on-site that are not reasonably visible or suspected at the ground surface. The client should realize that the subject property, which in our opinion, did not exhibit evidence that toxic or hazardous wastes were at the ground surface during our site inspection and field work, except as qualified herein, could later be impacted due to natural phenomena, human intervention, on-site pollution sources or contamination due to adjacent properties. These occurrences are beyond our control. Greenfield Environmental assumes that there are no hidden or unapparent environmental conditions of the site, subsoil, groundwater, structures or surroundings which would have an adverse effect on the subject property whether the source is on-site, adjacent properties, or properties in the nearby surrounding. This purpose of this Phase I ESA was not to provide an operational audit of any businesses at the site, if any, which would determine their compliance with regulatory requirements that may affect them. Greenfield Environmental or its representatives have conducted no off-site tests or evaluations of materials or substances found on the site for the purpose of assessing the presence of environmental Conditions not readily apparent during our visual observations made during the site visit. Information, estimates, and opinions furnished to Greenfield Environmental and its representatives, and contained in this report, were obtained from sources that are considered and assumed to be reliable, and believed to be true and correct. Greenfield Environmental and its representatives assumes no responsibility for any inaccuracies in such items which may be revealed as a result of subsequent action, either by Greenfield Environmental or others. These occurrences are beyond our control.

6.2 / 6.3 / 6.4 General Site Setting / Interior Observations / Exterior Observations

On-Site Operations and Activities
Please refer to Section 3.3.

Underground/Aboveground Petroleum Storage Tanks
No regulated petroleum Aboveground or Underground Storage Tanks (USTs) were observed on the subject property, and no registrations for petroleum USTs or ASTs were discovered during this ESA. In addition, no evidence of fill ports, vent pipes or other fuel tank components were readily observed during the site inspection.

Hazardous Substance or Petroleum Product Use, Storage and Disposal Practices
No hazardous substances or petroleum products are known to be currently used on the subject property.

Domestic Solid or Liquid Waste Disposal Practices
No solid or liquid waste is currently being generated at the subject site.
Odors
No chemical, petroleum or any other foul odors were physically observed or noted during the site inspection.

Pools Of Liquid
No standing pools of liquid, (other than water), were physically observed or noted during the site inspection.

Limited Polychlorinated Biphenyls (PCBs) Survey
Our representative conducted a limited site survey for the presence of PCB-containing or PCB-contaminated equipment consisting of visual observations for the presence of transformers, capacitors, and hydraulic equipment. Dielectric fluid and hydraulic oils containing PCBs was widely used in such equipment until 1979 when the U.S. EPA restricted such use. It is thought that most PCB production ceased around 1972. Many utilities, have since acted to replace PCB-containing and PCB-contaminated transformers and capacitors.

No transformers, capacitors or hydraulic equipment (elevators, in-ground lifts, etc.) were observed on-site by our representative during the limited PCB-survey.

No capacitors or hydraulic equipment (elevators, in-ground lifts, etc.) were observed on-site by our representative during the limited PCB-survey.

Impacted Soil or Distressed Vegetation
The subject property and all readily accessible areas of the subject site were traversed by a representative from Greenfield Environmental. Soils and vegetation on the subject property and peripheral areas were observed for visual and olfactory signs of degradation by hazardous substances and or petroleum products. No evidence of soil and vegetative distress or degradation was observed by the representative during the site inspection. No evidence of waste dumping, such as stockpiled debris, mounds, or depressions were observed on the subject property.

Drains / Sumps
No evidence of drains or sumps were observed by the representative during the site inspection.

Stained Concrete or Asphalt
No evidence of significant stained asphalt or concrete was observed by the representative during the site inspection.
7.0 INTERVIEWS

As part of this Phase I ESA, Greenfield Environmental interviewed several individuals in order to collect additional information concerning historical and present uses of the subject property.

7.1 Interview with Owner
Pursuant to ASTM E 1527-05, user supplied information in the form of a User Questionnaire, was forwarded to Greenfield Environmental. This questionnaire can be found in Appendix VI. The questionnaire was completed by Reverend Robert Tabbert, and did not reveal any issues that would indicate Recognized Environmental Conditions (REC's). The user has not disclosed any specialized knowledge pertaining to the subject property or surrounding areas or properties that might be material to identifying any Recognized Environmental Conditions in connection to the subject site.

7.2 Interview with Site Manager
None.

7.3 Interview with Occupants
None.

7.4 Interview with Local Government Officials
See Section 5.1.

7.5 Interview with Others
See Section 4.3.
8.0 FINDINGS
Based on the standardized research methods and resultant information contained within this Phase I Environmental Site Assessment, Greenfield Environmental has identified the following Recognized Environmental Conditions (RECs) in accordance with the 2005 EPA's Final All Appropriate Inquiry (AAI) Standard (40 CFR 312) and in compliance with the American Society for Testing and Materials (ASTM) Practice E-1527-05, Sections 12.5, 12.6 and 12.8. An REC being defined by the AAI standard as an identified conditions indicative of releases or threatened releases of hazardous substances, and in the case of inquiries conducted for persons identified in §312.1(b)(2), conditions indicative of releases and threatened releases of pollutants, contaminants, petroleum and petroleum products, and controlled substances (as defined in 21 U.S.C. 802) on, at, in, or to the subject property.

POTENTIAL CONTAMINATION DUE TO SOURCES LOCATED ON THE SUBJECT PROPERTY:
Hazardous substance contamination: No Recognized Environmental Conditions Identified
Petroleum product contamination: No Recognized Environmental Conditions Identified

POTENTIAL CONTAMINATION DUE TO SOURCES LOCATED ON ADJACENT PROPERTIES:
Hazardous substance contamination: No Recognized Environmental Conditions Identified
Petroleum product contamination: No Recognized Environmental Conditions Identified

POTENTIAL CONTAMINATION DUE TO SOURCES LOCATED WITHIN ½-MILE RADIUS:
Hazardous substance contamination: No Recognized Environmental Conditions Identified
Petroleum product contamination: No Recognized Environmental Conditions Identified

FURTHER DISCUSSION
No de minimus conditions with respect to the subject property were discovered during this Phase I ESA. These observances are not considered to be Recognized Environmental Conditions as defined by the EPA's AAI Standard.

9.0 OPINIONS
Based upon the REC's identified within Section 1.0 of this report, Greenfield Environmental recommends that additional investigation not be conducted at the subject site.

10.0 / 11.0 CONCLUSIONS / DEVIATIONS

CONCLUSIONS
Greenfield Environmental has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E 1527 of (Vacant Property, Blessed Pope John XXIII Church Site located at 13060 Palomino Lane in Ft. Myers, Florida), the property, and exceptions to or deletions from this practice are described in Section 11.0 of this report. This assessment has revealed no evidence of Recognized Environmental Conditions (REC's) in connection with the property.

DEVIATIONS
No deviations from the 2005 EPA's Final All Appropriate Inquiry (AAI) Standard (40 CFR 312) and the American Society for Testing and Materials (ASTM) Practice E were made during this Phase I ESA.
12.0 ADDITIONAL SERVICES

The following non-scope considerations were not performed as part of this Phase I ESA, and are not requirements of the EPA's AAI Standard or the ASTM E 1527-05 Practice; Asbestos Containing Materials (ACM), Radon, Lead-Based Paint, Lead In Drinking Water, Wetlands, Regulatory Compliance, Cultural And Historic Resources, Industrial Hygiene, Health & Safety, Ecological Resources, Endangered Species, Indoor Air Quality, Biological Agents and Mold.

The client may wish to assess the above issues in connection with a commercial real estate transaction. No implication is intended as to the relative importance of inquiry into such Non-Scope Considerations, and this list is not intended to be all inclusive.

Definitions:
- Adjacent Property includes those sites separated from the subject property by an easement such as a street, highway, railroad, etc., which would otherwise be immediately adjoining the subject site.
- Capacitor - a device for accumulating and holding a charge of electricity and consisting of conducting surfaces separated by a dielectric (40 CFR 761.3); may contain a dielectric that contains PCB's.
- Contamination means a non-permitted release of a hazardous substance, petroleum substance or product or polychlorinated biphenyl in sufficient quantity to cause damage to natural resources.
- Hazardous Substance means those substances as defined by the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA), 42 U.S.C. 9601 (14), and includes any material that is toxic, flammable, explosive, or corrosive as these terms are defined by CERCLA. Excluded from this definition are petroleum substances or products as defined below.
- Hazardous Waste defined in RCRA (Section 1004(5)) as a solid waste, or a combination of solid wastes, which because of its quantity concentration, or physical, chemical, or infectious characteristics may (A) cause, or significantly contribute to an increase in mortality or an increase in serious, irreversible, or incapacitating reversible illness; or (B) pose a substantial present or potential hazard to human health or the environment when improperly treated, stored, transported, or disposed of, or otherwise managed.
- Not Observed means no visual or olfactory evidence of said contamination was noted during the site inspection.
- Not Discovered means no information regarding said contamination was obtained from persons interviewed and no information was discovered in the Regulatory records that were reviewed.
- Non-PCB Containing means that the dielectric fluid in the electrical unit contains less than 50 ppm of PCB's.
- Poly-Chlorinated Biphenyl's (PCB's) - a mixture of compounds composed of the biphenyl molecule which has been chlorinated to varying degrees or any combination of substances which contains such substances (40 CFR 761.3). A suspected human carcinogen.
- PCB Contaminated means that the dielectric fluid in the electrical unit contains between 50 to 499 ppm of PCB's.
- PCB Transformer means that the dielectric fluid in the electrical unit contains over 500 ppm of PCB's.
- Petroleum Substance or Product means any material containing refined or crude oil, or any fraction thereof, and includes natural gas, natural gas liquids, liquefied natural gas, or synthetic gas usable for fuel, or mixtures of natural gas and such synthetic gas. Hazardous substances as defined above are excluded.
- Release means such occurrences as defined by CERCLA, 42 U.S.C. 9601 (10), and includes any intentional or accidental discharging, spilling, leaking, pumping, pouring, emitting, injecting, escaping, leaching, dumping or disposing into the environment.
- Transformer - devices that change (transform) one potential difference (voltage) to another. Typically transformers contain a dielectric fluid that has the potential to contain PCB's if the unit was manufactured before 1979; however, it is thought that most PCB production was ceased by 1972.
- EPA means the Environmental Protection Agency
- FDEP means the Florida Department of Environmental Protection
14.0 SIGNATURES OF ENVIRONMENTAL PROFESSIONALS (EP'S)

The discussions and conclusions contained in this Phase I ESA report have been reviewed by James E. Greenfield with Greenfield Environmental. This Phase I ESA was performed under the direct supervision of one or more of the Environmental Professionals (EP's) listed below and is found to conform to standard practices pursuant to the 2005 EPA's Final All Appropriate Inquiry (AAI) Standard (40 CFR 312) and in compliance with the American Society for Testing and Materials (ASTM) Practice E-1527-05. The professional services discussed herein have been performed using that degree of care and skill ordinarily exercised under similar circumstances by other scientists practicing in this field.

James E. Greenfield  6/15/09

Greenfield Environmental, Inc.
15.0 QUALIFICATIONS OF ENVIRONMENTAL PROFESSIONALS (EP's)

"I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental professional as defined in Sec. 312.10 of 40 CFR 312. I have the specific qualifications based education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312."

MR. JAMES E. GREENFIELD - PRINCIPAL

Mr. Greenfield holds a Bachelor of Arts degree in Biology from the University of South Florida. Mr. Greenfield has environmental-related experience in assessing the risks associated with real-property transactions since 1989.

MR. NICK EILERMAN - PROJECT MANAGER

Mr. Eilerman holds a Bachelor of Science degree in Environmental Science & Policy from the University of South Florida- St. Petersburg. Mr. Eilerman has environmental-related work experience since 2005 and experience in assessing the risks associated with real-property transactions since 2006.

Mr. James D. Branson,
Multifamily HUB Director
Charles Bennett Federal Building
U.S. Dept. of Housing and Urban Development
400 West Bay Street, Suite 1015
Jacksonville, FL 32202-5121

RE: Capital Advance Grant Application
Sponsor: Diocese of Venice
Owner: (Corporation to be formed-Pope John XXIII)
Property: 13060 Palomino Lane
           Ft. Myers, Lee County, FL

Dear Mr. Branson:

This letter shall serve as a limited opinion of title for the above-referenced project. I hereby submit a copy of Attorney's Title Insurance Fund, Inc.'s Certificate No. 18-2009-1528 for the above-reference property prepared on the 14th day of April, 2009, confirming title is in the name of Frank J. Dewane, As Bishop of the Diocese of Venice, a Corporation Sole. I have reviewed the items shown as exceptions, and do hereby confirm that the site is free of any reversioners which could adversely affect the use of the site for the proposed project for the 40-year Capital Advance period under HUD's regulations and requirements.

In the event of the proposed project being selected for a Capital Advance Grant, a title insurance commitment and/or title policy insuring the property will be issued consistent with the terms of the Title Certificate, subject to matters of record in the Public Records of Lee County, Florida subsequent to the Effective Date of the Title Certificate enclosed herewith.

Very truly yours,

DIVITO & HIGHAM, P.A.
